miro

What is Miro?

Miro is a visual workspace for innovation that enables distributed teams of any size to dream, design, and build the future together. It enables distributed teams to come together to synthesize information, clarify complex ideas, and make decisions faster.
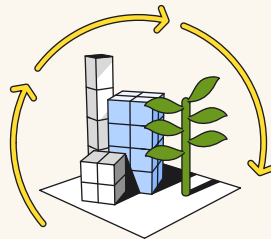

Why choose us?

Miro is a leader across platforms like G2, Trustpilot, GPI, and offers enterprise-grade security and compliance across all aspects of how teams collaborate, ideate, and store their work.
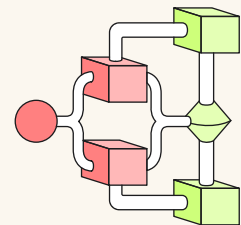

Workshops & async collaboration

Speed up feedback loops and fuel engagement via a dynamic toolkit, from interactive workshops to immersive video walkthroughs.

Product development workflows

Make planning seamless and inclusive through 2-way integrations with Jira & Azure, dedicated planning features, dependency mapping tools and anonymous mode for retros.

Diagramming & process mapping

Import existing diagrams from Lucid, Draw.io or Visio.
Get started fast with grid views, themes, swimlanes and more.

Miro Assist

Miro Assist is your AI partner that uses your board content to help you do your best work, faster. From research insights to instant presentations, make smarter decisions and build the next big thing with a prompt, a chat, or a click.
