Data Protection

Sustainable, Value-Based Strategies

Data is a strategic asset for every organization, and its loss can negatively impact reputation, profitability, and innovation. Protecting data from corruption, theft, or loss depends on understanding its value, sensitivity, and risks and having clear visibility into its location.

Our team has extensive, cross-industry experience in evaluating data protection programs, developing strategic roadmaps with prioritized initiatives, and implementing data protection technologies. We combine our expertise, strong partnerships with leading data protection solution vendors, and deep technical competencies to provide a thorough understanding of the policies and procedures necessary for strong data protection.

Data Protection Strategy & Governance

Assess, develop, and maintain a data protection program that allows continuous monitoring and re-evaluation of risks and assessment of control effectiveness. Your data protection program should ensure your data is protected throughout its lifecycle, from creation to disposal.

Data Protection & Risk Assessments	Foundational Policies, Procedures & Documentation	Strategy & Roadmap Development

Data Discovery & Classification

Identify, locate, and classify your critical and sensitive data so that protections are in line with value.

Classification	Data Discovery & Inventory	Schema & Standards

Technology Evaluation & Implementation

We guide you through the selection of the right data protection technology and assist in configuration and management to ensure optimum performance and protection.

Evaluation & Selection	Implementation	Operations
Technologies Include:		
o Data Loss Prevention	o Data Classification, Labeling & Tagging	o Key/Certification Management
o Database Activity Monitoring	o Data Encryption, Tokenization & Masking	o Digital Rights & Information Rights Management
o Data Discovery & Remediation		

BENEFITS

Reduce Risk of a Data Breach

Apply a Sustainable Approach

Improve Overall Cybersecurity Posture

Identify Opportunities for Improvement

Relentlessly Focused on Cybersecurity

When you partner with Converge Cybersecurity, you can expect your priorities to be ours. Our team of strategists, former CISOs, and security experts provide unbiased expertise to help you build, manage, and optimize cybersecurity across your enterprise.

From technology solutions to advisory services, we bring our decades on the front lines of cybersecurity to help you safeguard your organization in a shifting landscape of risks, vulnerabilities, and regulations. We listen first, apply our expertise to address your challenges, and ensure that the technologies we deliver meet your current and future needs.

Penetration Testing → Governance, Risk & Compliance → Incident Readiness & Response → Strategy & Defense

Data Protection ← Identity & Access Management ← Strategic Staffing ← Managed Security
