

P O T T E R Y B A R N

Bronze Cube Shelf

Mounting Instructions for: Small Square, Large Square, Long Rectangle

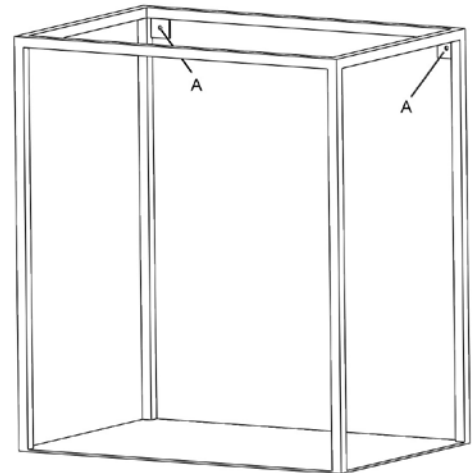

Tools Required: Level, Pencil, Stud-Finder, Phillips Screwdriver, **Hardware (included):** (2) Anchors
(2) Screws

Load Limits: Small Square: 30 pounds
 Large Square: 40 pounds
 Long Rectangle: 30 pounds

There are three different sizes of this item. These mounting instructions apply to any of the three. The image shown below is an exemplary image to show the locations of mounting holes. Each item includes two mounting holes (A, A), one located in each upper corner. These holes receive mounting hardware for hanging the item on a wall, as explained in detail below.

The hardware included with this item is meant for drywall only. If your walls are made from concrete, brick or plaster, please consult your local hardware store for assistance in selecting the appropriate hardware.

- 1) With the help of another person, hold the item against a wall at a desired mounting location. Use a level to make sure that the item is being held level and then use a pencil to mark the wall through each of the mounting holes (A, A).
- 2) If either mark aligns with a wall stud (use a stud finder to determine this), do not use the provided anchor at that location since they cannot penetrate wood. Use a screwdriver to secure a screw through the mounting hole (A) and directly into the wall and stud at that mark, when instructed to do so below.
- 3) For marks that do not align with a wall stud, use the screwdriver to install an anchor into the wall. To do this, place the tip of the anchor at a mark and use the screwdriver to both rotate the anchor (clockwise) and firmly push it into the wall. The anchor will drive itself into the wall like a screw. Continue rotating the anchor until its wide end is even with the wall surface. Do not over-tighten.
- 4) With the help of others, lift the item against the wall so that the mounting holes align with either a stud-aligned wall mark or an installed anchor. Use the screwdriver to secure a provided metal screw through each mounting hole and into either the stud or the installed anchor. Rotate clockwise to tighten.
- 5) The item is now secured to the wall and ready to use.

Care Instructions:

To clean: Wipe with a soft, dry cloth.
 Do not use abrasive or strong chemical household cleaners.

Thank you for your purchase!
