**Supplier Name:** Huma Therapeutics Limited

**Publication Date:** 26 June 2024

## Commitment to Achieving Net Zero

Huma Therapeutics Limited is committed to achieving Net Zero emissions by 2040. Our Carbon Reduction Plan delineates our current emissions data, future targets, and strategic actions to realise our environmental goals.

## Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Our baseline emissions, calculated by an independent third party, conform to the GHG Reporting Protocol and the UK BEIS conversion factors. These calculations are based on the Financial Control emission boundary and reflect our latest emissions data.
