

Pixieset transforms images on-the-fly with Amazon S3 Object Lambda

"We're super excited about Amazon S3 Object Lambda's integration with Amazon CloudFront because we can apply transformations and watermarks on-the-fly as images are accessed from Amazon CloudFront. We will be able to take advantage of the benefits of global caching, while no longer needing to store multiple copies of the same image."

- Sam Lin, Head of Engineering, Pixieset
