Additional facts about how we share your Personal Information

The third parties with whom we share your Personal Information are bound to comply with similar and equally stringent undertakings of privacy and confidentiality.

We also share your Personal Information with third parties to comply with legal obligations; when we believe in good faith that an applicable law requires it; at the request of governmental authorities or other third parties conducting an investigation; to detect and protect against fraud, or any technical or security vulnerabilities; to respond to an emergency; or otherwise to protect the rights, property, safety, or security of third parties, visitors to our websites, our businesses, or the public.

We do not grant access to your Personal Information to any other third parties unless we say so in this Privacy Notice or unless the law requires it.

We do not knowingly collect the Personal Information of minors

Our products and services are not directed to minors under the age of 18 and we do not knowingly collect or sell the Personal Information of minors.

How do we keep your Personal Information secure?

We implement and maintain reasonable security appropriate to the nature of the personal information that we collect, use, retain, transfer or otherwise process. Our reasonable security program is implemented and maintained in accordance with applicable law and relevant standards as outlined in the report issued by the California Attorney General in February 2016, available at <https://oag.ca.gov/sites/all/files/agweb/pdfs/dbr/2016data-breach-report.pdf>. Specifically, among other safeguards, our reasonable security program implements and maintains all 20 of the Center for Internet Security's Critical Security Controls for Effective Cyber Defense identified in Appendix A of the California Attorney General Report. As noted in that report, "there is no perfect security," and reasonable security is a process that involves risk management rather than risk elimination. While we are committed to developing, implementing, maintaining, monitoring and updating a reasonable information security program, no such program can be perfect; in other words, all risk cannot reasonably be eliminated. Data security incidents and breaches can occur due to vulnerabilities, criminal exploits or other factors that cannot reasonably be prevented. Accordingly, while our reasonable security program is designed to manage data security risks and thus help prevent data security incidents and breaches, it cannot be assumed that the occurrence of any given incident or breach results from our failure to implement and maintain reasonable security.

What about marketing?

We endeavor in good faith to adhere to self-regulatory advertising principles, such as the Digital Advertising Alliance's Principles. Please note that while we provide these links for your convenience, we do not have access to, or control over, these third parties' use of cookies or other tracking technologies.

Do we respond to "Do Not Track" signals?
