Document AI

Document AI turns unstructured data into structured data through state of the art technology. Google combines their deep expertise in machine learning to achieve up to 2.5x better results than its competitors into this field. Document AI makes your data easier to understand, analyse, and consume by providing structure.
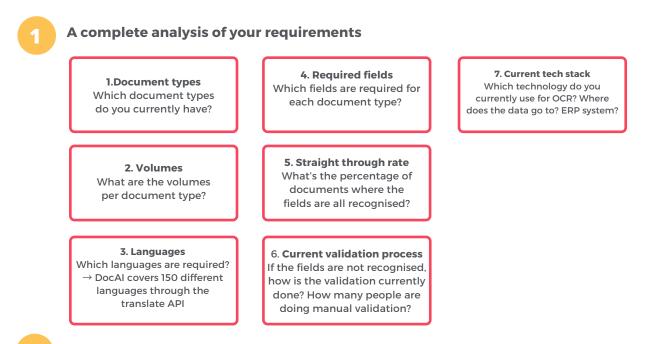

WHY CHOOSE DOCUMENT AI?

- Drastically improve operational efficiency by automatically detecting the data that you are looking for on specific document types like invoices, receipts, ...
- Unlock insights by structuring the goldmine of data that is sitting on documents, paper, ... and make faster decisions by making your data available to your users and applications.
- Rely on Google's security model and world-scale infrastructure

EVALUATE THE POWER OF DOCUMENT AI YOURSELF

Benefit from our standardised approach to evaluate your environment and discover what the impact of Document AI is going to be within your business.

This evaluation of your environment entails the following aspects:

1 **A complete analysis of your requirements**

1. Document types Which document types do you currently have?	**4. Required fields** Which fields are required for each document type?	**7. Current tech stack** Which technology do you currently use for OCR? Where does the data go to? ERP system?
2. Volumes What are the volumes per document type?	**5. Straight through rate** What's the percentage of documents where the fields are all recognised?	
3. Languages Which languages are required? → DocAI covers 150 different languages through the translate API	**6. Current validation process** If the fields are not recognised, how is the validation currently done? How many people are doing manual validation?	

2 **Running 500 documents through DocumentAI to show its results**

Week 1
Organisation provides us 500 documents for a maximum of 2 document types including the ground truth*.   * The ground truth is the verified, structured data for these 500 documents

Week 2
Devoteam G Cloud parses the documents with DocumentAI

3 **We create a dashboard to compare the Document AI results with your previous technology**

Devoteam G Cloud presents the results.
