

Firstup and SAP Concur: One-click employee access to expenses

Access and view SAP Concur activity—including pending, paid, and summary expenses—within Firstup.

Firstup is your employees' easy entryway to Concur expenses

Enable a new gateway for employee expense information with **Firstup Command Integration for Concur**. Instead of navigating to the Concur mobile or web application for expense inquiries, give employees a convenient resource within the Firstup platform.

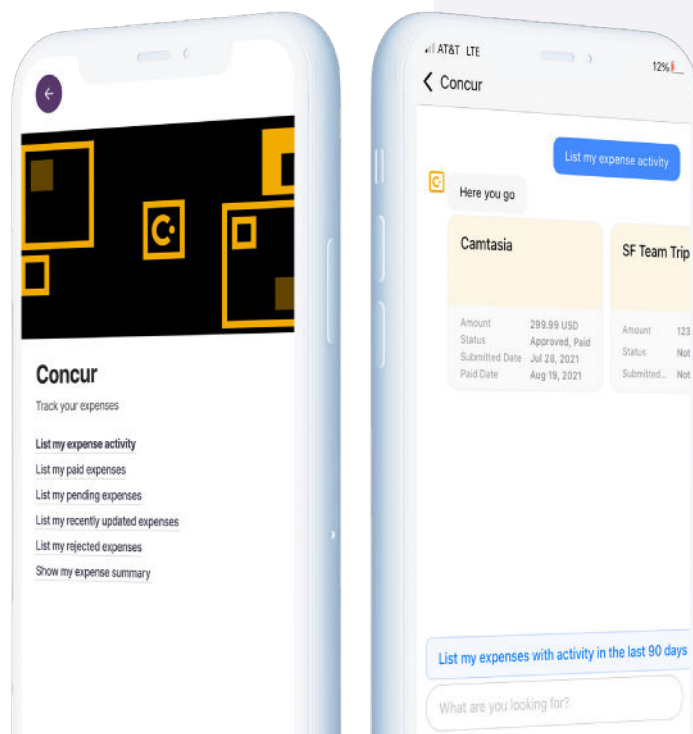

Improve the digital employee experience and increase the value of your Concur deployment by providing easier access to one of your most used applications. While complex employee actions are best supported through Concur, basic expense commands can now be answered through Firstup to create seamless access to expense information.

Through the Firstup desktop or mobile app, admins can target specific user groups and individuals with relevant Concur prompts for a personalized command experience.

How it works

Employees simply navigate to the Concur icon within the Firstup Command Center. A simple click of a prompt provides immediate answers to common requests, such as:

- List my expense activity
- List my paid expenses
- List my pending expenses
- List my recently updated expenses
- List my rejected expenses
- Show my expense summary

Simplify the day-to-day

Employees can complete common tasks, **all in one place**

Reduce the steps needed to locate expense information

Easy, mobile access for frontline and deskless workers
