LIVE. LONG. DC.

DC Opioid Stakeholder Summit

February 5, 2020 Summary Report

Overview

PURPOSE:

To convene the LIVE. LONG. DC. stakeholder community in a generative discussion about how to continually implement strategies to address the District's opioid epidemic

OUTCOME:

- Shared learning across the continuum of care for the LLDC stakeholder community
- Shared understanding of cross-agency and cross-organizational opportunities for collaboration and coordination

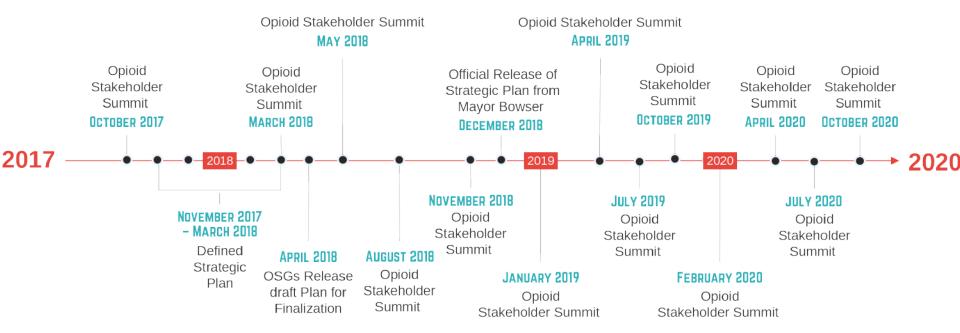

AGENDA:

- Welcome and Opening Remarks
- II. Data Presentations
 - Office of the Chief Medical Examiner
 - II. Department of Forensic Sciences
- III. Panel of the Continuum of Care
- IV. Small Group Conversations
- V. 1115 Waiver Presentation
- VI. Closing Remarks

DC Opioid Timeline

Presentations

Dr. Chikarlo Leak, Office of the Chief Medical Examiner (OCME): Snapshot of Fatal Overdoses in the District

OCME shared data on trends in the number of fatal opioid overdoses.

Dr. Luke Short, Department of Forensic Sciences (DFS): What Opioids are on the Streets?

 DFS shared data on trends in drug testing and surveillance efforts to capture the impact of fentanyl in the District.

Panel Discussion

The panel consisted of members that represent areas on the continuum of care in the District and who are actively addressing the District's opioid epidemic. Panel Members:

- Dr. Chikarlo Leak, OCME
- Dr. Luke Short, DFS
- Ishan Heru, Community Connections
- Cyndee Clay, HIPS
- Charles Dark, DC Prevention Center Wards 5&6
- Jerome Thomas, DCPL

Panel Discussion

Themes from the conversation include:

- The impact of increased availability of Naloxone kits throughout the city has made a difference.
 - In 2018 there were 4,000 kits and in 2019 there were over 60,000 kits.
- Better communication between programs on the ground and public agencies
 - Services have strengthened collaborations and built off one another
- Awareness of the risks that new drugs present and it's impact on different populations
 - The increase in K2 laced with fentanyl is impacting youth and young adults
- Education is critical to enabling people to make educated decisions
 - Importance of education to individuals when they are young about the dangers of substances to prevent substance use

Small Group Discussions

To continue the momentum on conversations had during the October 2019 Summit, the room divided into small groups to discuss what is working well to reduce the death rate. The following groups were represented:

- Prevention
- Harm Reduction
- Treatment
- Recovery
- Interdiction

Small Group Discussions

The groups were asked to answer the following questions:

- 1. Based on today's new information, what needs to be added to this list?
- 2. What are the top 3 priorities that we must do as a collective?
- 3. What must we do in the next 30 days, 90 days, and by the end of 2020?
- 4. What needs to be tracked and how can we measure this? What are the milestones and/or measures of success?

Below are the top priorities that groups decided were most important to do in 2020:

Prevention

- Push engagement with schools that have a high OUD concentration
- Develop fact sheet/visual information for community and youth
- 3. Conduct a youth survey to understand what their needs are and what they know about opioids
- 4. Saturate the city with campaigns and advertisements and increase education about fentanyl
- Provide support services for families dealing with addiction and reduce stresses that can prevent addiction onset

Harm Reduction

- Expand peer outreach teams
- 2. Expand syringe exchange programs
- 3. Improve (increase) naloxone access points

Treatment

- 1. Contact Sheet
- Resource Guide
- 3. Website Access

Recovery

- 1. Address barriers for youth getting into treatment
- Conduct a study to follow person-centered design of the system
- 3. Increase peer workforce
- 4. Increase paths to recovery

Interdiction

- Increase collaboration between public safety and criminal justice
- 2. Establish a POC in agencies to store information
- 3. Timely intelligence
