\*Note: Counts less than ten are automatically suppressed.

All dispatch types above follow the guidelines set by the National Emergency Medical Services Information System (NEMSIS). Data is limited to 27 US states with statewide partnerships with biospatial.io: Alabama, Alaska, Arkansas, California, Colorado, Florida, Georgia, Idaho, Illinois, Kansas, Kentucky, Maine, Michigan, Minnesota, Mississippi, Montana, New Mexico, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Utah, Virginia, Wisconsin, and Wyoming.

**Opioid-related** dispatches are based on the Enhanced State Opioid Overdose Surveillance (ESOOS) criteria as defined by the state of Rhode Island, intended to detect incidents involving opioid overdose.

**Heroin-related** dispatches are based on the ESOOS criteria as defined by the state of Rhode Island, intended to detect incidents involving heroin overdose. Heroin overdoses are a subset of opioid overdoses.

**Methamphetamine-related** dispatches are based on incidents involving methamphetamine due to terms and phrases found in the record narrative and chief complaint elements.

**Non-opioid-related dispatches** are based on the Virginia Department of Health criteria for incidents involving non-opioid overdoses; indicates events where naloxone administration response is unchanged or worse, or involving ICD-CM-10 codes for cocaine, cannabis, LSD, or other unspecified psychodysleptics.
