Experience

Clayfin Technologies, Chennai

Java Developer

2023 May - 2023 September

- Led end-to-end development of new APIs as a Java Backend Developer at Clayfin Technologies.
- Utilized Spring and Spring Boot frameworks for API development, crafting APIs and engineering intricate business logic while aligning responses meticulously with documentation standards.
- Optimized existing codebases, resulting in improved response times and enhanced system efficiency.
- Successfully integrated a third-party API, eliminating costly premium subscriptions and strengthening the project's data foundation.
- Role expanded expertise in Java and Spring technologies, including hands-on experience with MS SQL and Oracle databases for deepened database management skills.
- Acquired proficiencies in Spring Batch and the ELK stack, enhancing the corporate skill set.

Projects

E-COMMERCE PLATFORM REST API

IndividualProject | Execution Timeline: 1 Week

- REST API for an ECommerce platform which offers customers a simple & user-friendly shopping
- Area of Responsibility : Orchestrated Spring Boot Layered Architecture | Ensured Spring Security Integration with JWT | Established Table Relationships
- Features : Spring Boot Layered Architecture | Uploading & Serving Image, Model Mapping, HateOAS | Validation | Pagination | Filtering | Sorting & Searching | A.P.I Responses & Exception Handling.
- Tech Stack :- Java | Hibernate | MYSQL | SpringBoot | Spring Framework
- Project link :- <https://rb.gy/con22>

DIGITAL WALLET REST API

IndividualProject | Execution Timeline: 1 Week

- Created REST API for an Online Digital Wallet Platform that allows customers and simple payment experience.
- Area of Responsibility : Git Repository Management | Implemented Wallet Module with Login & Authentication Feature | Compilation, Data Management and Deployment.
- Features : Used Spring Boot Layered Architecture for designing. Implemented Authentication and Authorization with basic current user session logic.
- Tech Stack :- Java, Hibernate, MYSQL, SpringBoot, Spring Framework, Maven, Postman
- Project link :- <http://surl.li/qnhot>
