Data is limited to 24 US states with statewide partnerships with biospatial.io: Alabama, Alaska, Arkansas, California, Colorado, Florida, Georgia, Idaho, Illinois, Kansas, Kentucky, Maine, Michigan, Mississippi, Montana, New Mexico, New York, Rhode Island, South Carolina, Tennessee, Utah, Virginia, Wisconsin, and Wyoming.

911 dispatch type	Description of dispatch
Opioid-related	Based on the Enhanced State Opioid Overdose Surveillance (ESOOS) criteria as defined by the state of Rhode Island, intended to detect incidents involving opioid overdose.
Heroin-related	Based on the Enhanced State Opioid Overdose Surveillance (ESOOS) criteria as defined by the state of Rhode Island, intended to detect incidents involving heroin overdose. Heroin overdoses are a subset of opioid overdoses.
Methamphetamine-related	Based on incidents involving methamphetamine due to terms and phrases found in the record narrative and chief complaint elements.
Non-opioid-related	Based on the Virginia Department of Health criteria for incidents involving non-opioid overdoses. Indicates events where naloxone administration response is unchanged or worse, or involving ICD-CM-10 codes for cocaine, cannabis, LSD, or other unspecified psychodysleptics.
