Lake, FL	–*	11/2	Non-opioid	Wake, NC	–*	10/19	Opioid
Lake, FL	11	11/7	Non-opioid	Wake, NC	13	11/3	Opioid

\*Note: Counts less than ten are automatically suppressed.

In this report, counties with four or more days with alerts for non-opioid overdoses or opioid-related overdoses in the past eight weeks (September 14 to November 8) were identified. During this period, there were a total of five counties that met this criteria, including Kings County, NY; Lake County, FL; Northampton County, PA; Orange County, FL; and Wake County, NC. The number of overdose events occurring on days with alerts ranged from being suppressed (<10 events) to 26).

All dispatch types above follow the guidelines set by the National Emergency Medical Services Information System (NEMSIS). Data is limited to 27 US states with statewide partnerships with biospatial.io: Alabama, Alaska, Arkansas, California, Colorado, Florida, Georgia, Idaho, Illinois, Kansas, Kentucky, Maine, Michigan, Minnesota, Mississippi, Montana, New Mexico, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Utah, Virginia, Wisconsin, and Wyoming.

**Non-opioid-related dispatches** are based on the Virginia Department of Health criteria for incidents involving non-opioid overdoses; indicates events where naloxone administration response is unchanged or worse, or involving ICD-CM-10 T codes for cocaine, cannabis, LSD, or other unspecified psychodysleptics.

**Opioid-related dispatches** are based on the Enhanced State Opioid Overdose Surveillance (ESOOS) criteria as defined by the state of Rhode Island, intended to detect incidents involving opioid overdose.
