

Smart Bidding Strategies

Part 1

Smart Bidding

The Google Ads API Developer Series

Ben Karl

Developer Relations Engineer

Smart Bidding Strategies

- Maximize conversions
- Maximize conversion value
- Target cost per action (CPA)
- Target return on ad spend (ROAS)
- Enhanced cost per click (ECPC)

Smart Bidding Strategies

- Maximize conversions
- Maximize conversion value
- Target cost per action (CPA)
- Target return on ad spend (ROAS)
- Enhanced cost per click (ECPC)

Standard Bidding Strategy

Standard Bidding Strategy

Python

```
operation = client.get_type("CampaignOperation")
campaign = operation.create
campaign.maximize_conversions.target_cpa = 10000

response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

Standard Bidding Strategy

Python

```
operation = client.get_type("CampaignOperation")
campaign = operation.create
campaign.maximize_conversions.target_cpa = 10000

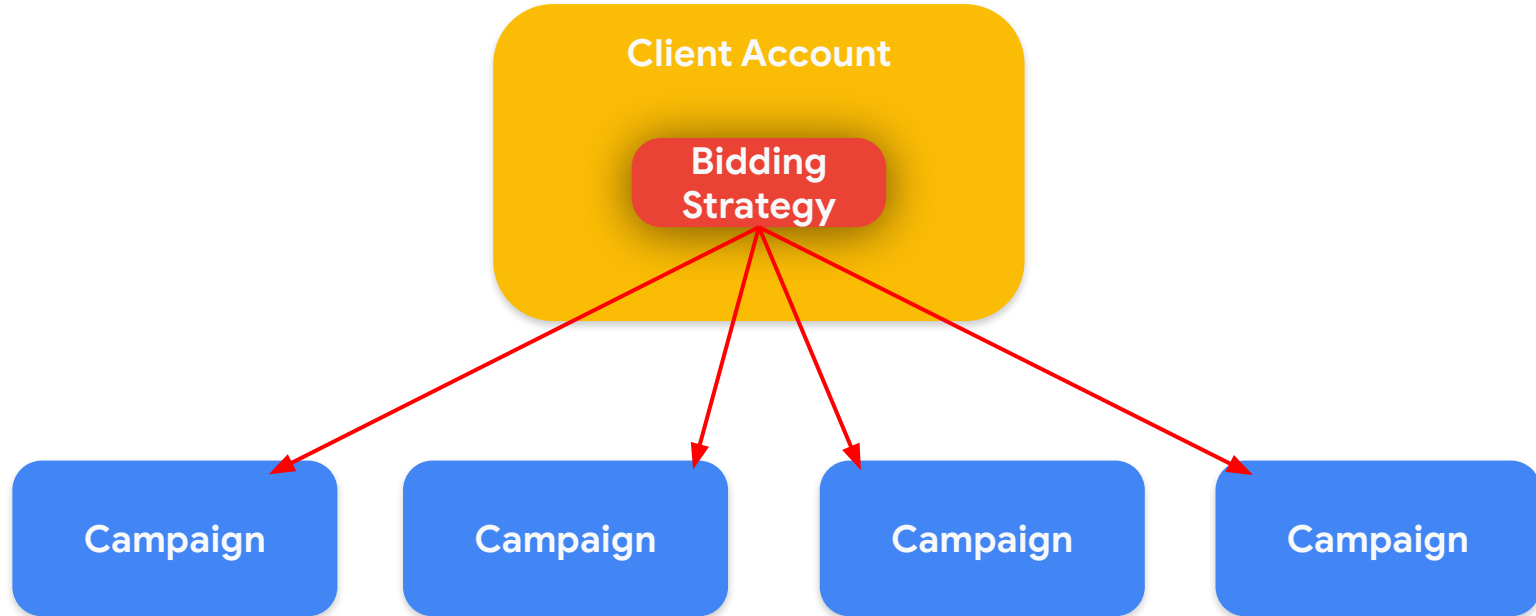

response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

One of field can
be one of many
options.

Standard Bidding Strategy

Portfolio Bidding Strategy

Portfolio Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
bidding_strategy = operation.create
bidding_strategy.maximize_conversions.target_cpa = 10000

response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=manager_customer_id, operations=[operation]
)
resource_name = response.results[0].resource_name
```

Portfolio Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
bidding_strategy = operation.create
bidding_strategy.maximize_conversions.target_cpa = 10000

response = bidding\_strategy\_service.mutate\_bidding\_strategies(
    customer_id=manager_customer_id, operations=[operation]
)
resource_name = response.results[0].resource_name
```

Portfolio Bidding Strategy

Python

```
operation = client.get_type("CampaignOperation")
campaign = operation.create
campaign.bidding\_strategy = resource_name

response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

**Returned by the
previous mutate
request.**

Portfolio Bidding Strategy

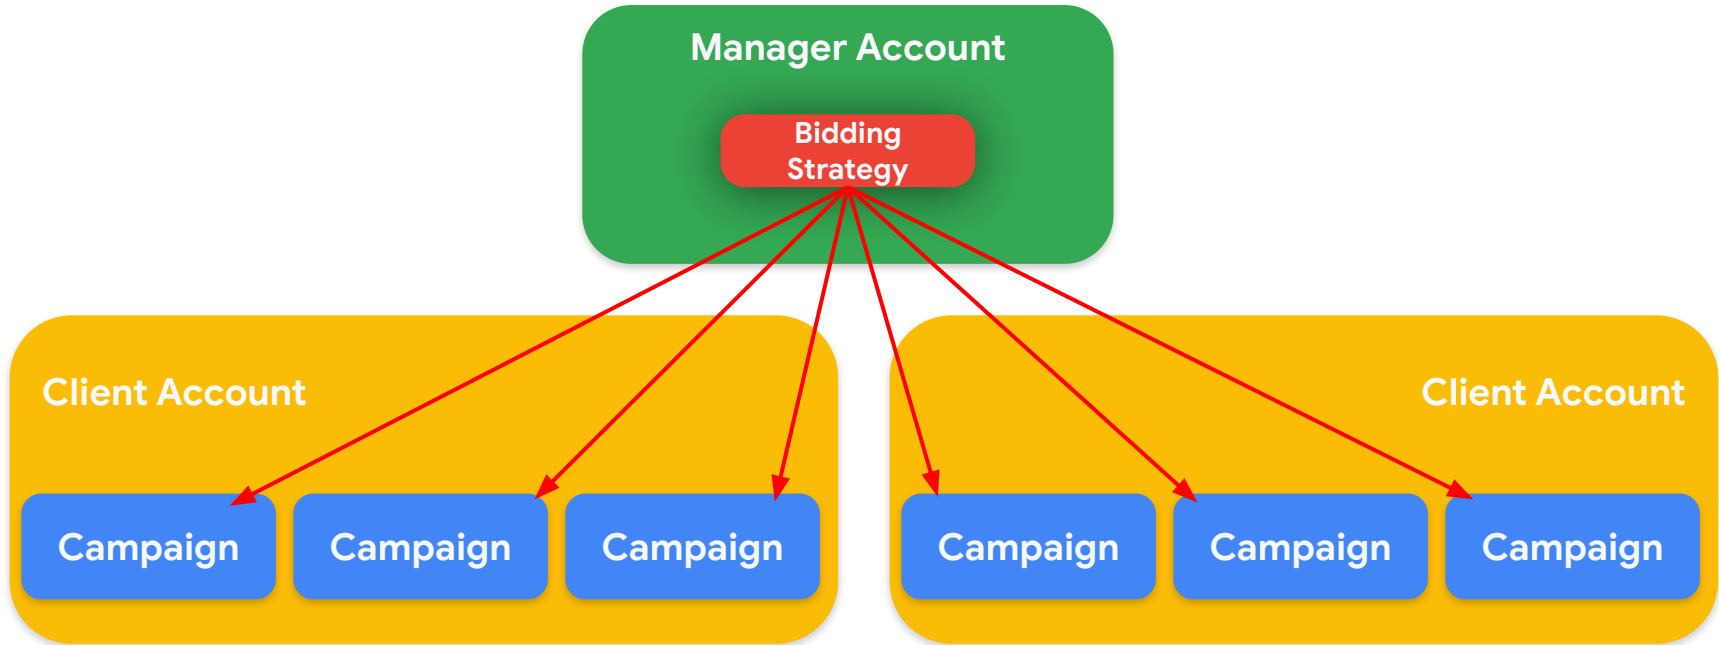

Python

```
operation = client.get_type("CampaignOperation")
campaign = operation.create
campaign.bidding_strategy = resource_name
response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

Oneof field.

Returned by the
previous mutate
request.

Cross-account Bidding Strategy

Cross-account Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
bidding_strategy = operation.create
bidding_strategy.maximize_conversions.target_cpa = 10000

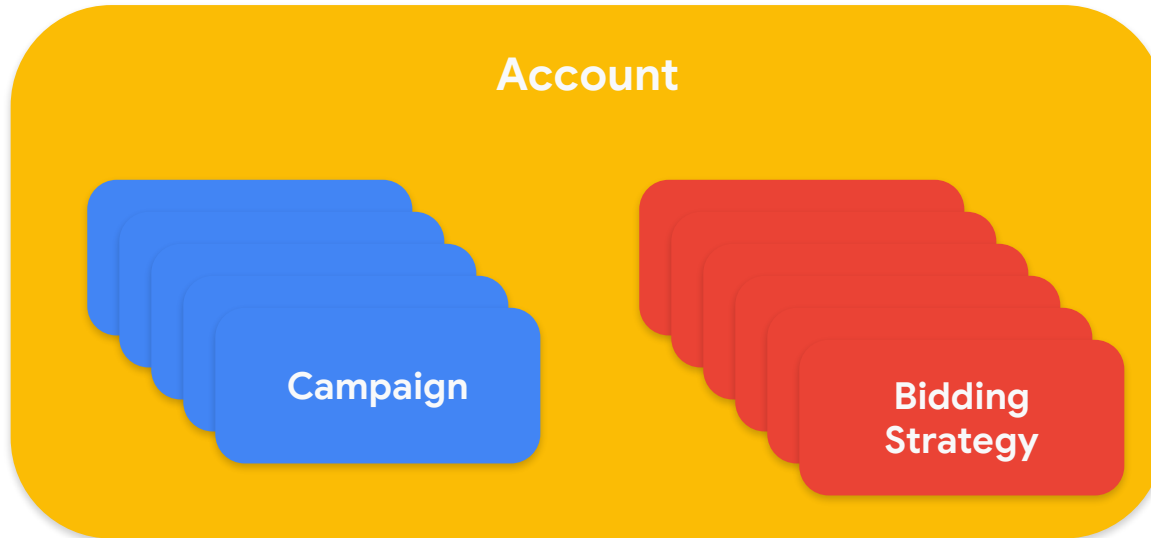

response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=manager_customer_id, operations=[operation]
)
resource_name = response.results[0].resource_name
```

 **Manager Customer ID**

Maximize Conversions Bidding Strategy

Standard Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("CampaignOperation")
campaign = operation.create
campaign.maximize_conversions.target_cpa = 10000

response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=customer_id, operations=[operation]
)
```

Standard Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("CampaignOperation")
campaign = operation.create
campaign.maximize_conversions.target_cpa = 10000

response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=customer_id, operations=[operation]
)
```

Standard Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("CampaignOperation")
campaign = operation.create
campaign.maximize_conversions.target_cpa = 10000

response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=customer_id, operations=[operation]
)
```

Portfolio Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
operation.create.maximize_conversions.target_cpa = 10000
response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=manager_customer_id, operations=[operation]
)

operation = client.get_type("CampaignOperation")
operation.create.bidding_strategy = response.results[0].resource_name
response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

Portfolio Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
operation.create.maximize_conversions.target_cpa = 10000
response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=manager_customer_id, operations=[operation]
)
```

```
operation = client.get_type("CampaignOperation")
operation.create.bidding_strategy = response.results[0].resource_name
response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

Portfolio Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
operation.create.maximize_conversions.target_cpa = 10000
response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=manager_customer_id, operations=[operation]
)

operation = client.get_type("CampaignOperation")
operation.create.bidding_strategy = response.results[0].resource_name
response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

Cross-account Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
operation.create.maximize_conversions.target_cpa = 10000
response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=manager_customer_id, operations=[operation]
)

operation = client.get_type("CampaignOperation")
operation.create.bidding_strategy = response.results[0].resource_name
response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

Cross-account Maximize Conversions Bidding Strategy

Python

```
operation = client.get_type("BiddingStrategyOperation")
operation.create.maximize_conversions.target_cpa = 10000
response = bidding_strategy_service.mutate_bidding_strategies(
    customer_id=manager_customer_id, operations=[operation]
)
```

Linked

```
operation = client.get_type("CampaignOperation")
operation.create.bidding_strategy = response.results[0].resource_name
response = campaign_service.mutate_campaigns(
    customer_id=customer_id, operations=[operation]
)
```

Maximize Conversions Protobuf Definition

Protobuf

```
message MaximizeConversions {  
    int64 target_cpa = 1;  
    int64 cpc_bid_ceiling_micros = 2;  
    int64 cpc_bid_floor_micros = 3;  
}
```

Maximize Conversions Protobuf Definition

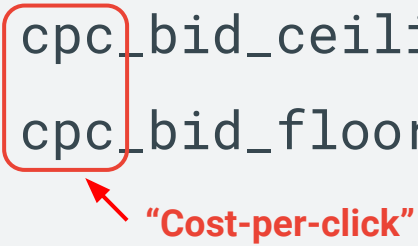

Protobuf

```
message MaximizeConversions {  
  int64 target_cpa = 1; ← “Cost-per-action”  
  int64 cpc_bid_ceiling_micros = 2;  
  int64 cpc_bid_floor_micros = 3;
