Indexing Australian content in Trove

ESEAP 2022
[[User:Samwilson]]

What Trove includes

- **Books and Libraries** (books, audio books, websites, monographs, scores, etc.)

- **Diaries, Letters, and Archives** (records, manuscripts, personal archives, etc.)

- **Research and Reports** (datasets)

- **Music, Audio and Video** (transcripts, interviews, oral history, movies, etc.)

- **Images, Maps, and Artefacts** (photos, illustrations, artwork, maps, etc.)

- **People and Organisations** (*no longer accepted?*)

What we can provide

- **Wikisource:** Transcripts of written works. (Wikidata.)

- **Commons:**

  - **Individual files and data pages:** images, audio, video, datasets, etc. (Structured Data on Commons.)

  - **Categories:** records, collections, etc. (Wikidata.)

- **Wikipedia:** people and places. (Wikidata.)

Selecting works

- **What is 'Australian content'?**

- **Can it be defined with Wikidata queries?**

- **Initially opt-in via {{trove}} template (and category).**

- **Avoid multiple entries for e.g. derivative files on Commons.**

- **Handle works that are already on Trove (regardless of originating on Wikimedia *or* other repositories)**

Workflow

1) Add {{trove}} template to a page (inc. talk and sub pages)

2) Page is added to category

3) Tool scans category and exports required metadata

4) Trove harvests the tool's output

5) Tool queries Trove for work IDs of items, and updates Wikidata/SDC

The output of {{trove}} changes based on the current stage in this workflow

Toolforge tool

- **https://troveau.toolforge.org**

- **Creates OAI-PMH feed of everything we want to export**

- **Updates *Trove work ID* (P10044) on Wikidata and SDC, daily**

- **Publicly logs all tool activity, to help clean up data**

- **Imports other metadata from Trove (e.g. state libraries' catalogue IDs)**

Next steps

1) Create {{trove}} template and add to existing items

2) Fill those with *Trove work ID* (P10044)

3) WMAU to sign up as Trove Partner (~$2,000/year?)

4) Get NUC Symbol to identify Wikimedia (or WMAU?)

5) Start adding {{trove}} to new items
