RE: **New Material Stream and Sorting Guide - Crystal**

Please be advised that two (2) Manufacturers of refillable crystal beverage containers have been approved to sell several products in Alberta. These Manufacturers have been designated by the Alberta Gaming, Liquor and Cannabis Commission (AGLC) as Collection Service Providers (CSPs) and will be responsible for the collection of their own beverage containers.

Please note that these crystal beverage containers are REFILLABLE, and it is imperative that they do not end up in the glass material stream as crystal is a significant contaminant to glass.

The Beverage Container Management Board (BCMB) has developed a Material Sorting Guide specifically for these refillable crystal beverage containers. Due to the contamination risk, it is important that a depot follow the Guide carefully if one of these containers is returned by a customer. These beverage containers are sold at a high price point and are expected in low sales volumes in Alberta. They are not likely to be returned to a depot due to their value, but rather saved or reused by consumers. However, please ensure all staff are familiar with the Refillable Crystal Material Sorting Guide so they can be properly prepared should one of these beverage containers ever be returned. The Refillable Crystal Material Sorting Guide can be found on the BCMB website at the link below, in the "Forms & Guides" tab:
