RE: IT System Modernization Project

 Attention Depot Operators and staff,

As many of you may be aware from our recent request for proposals (RFP), the BCMB is undertaking a project to update all of our IT systems. This update includes the container registration system and reliant systems (portal.bcmb.ab.ca and Depot Android/IOS app).

While the project is still in the early stages, the BCMB recognizes that this change will have an effect on depots and the ABDA. This update will revamp the entire system and provide new and exciting functionality for end users. Depot owners and employees will have access to data and functions not possible in the old system (e.g. updating depot business hours). It will also enhance security and ensure system stability against modern threats.

As this update moves forward communication will be key to ensure the least amount of inconvenience and disruption. As part of the project, the BCMB is working on a communications plan to ensure that all of our partners are kept up to date with the changes. Please look forward to future communications from our team.

In the meantime, if you have any questions or concerns, please direct them to Travis Wizniuk, Manager of Information Technology, at twizniuk@bcmb.ab.ca.
