DATE: March 19, 2024

RE: **Danone Inc. Seasonal Containers**

Attention Depot Operators and Staff,

This notice is regarding the acceptance of containers manufactured by Danone Inc. which have been registered through Alberta's deposit-refund system. Due to the nature of their business, some Danone product containers use the same UPC for many variations of their label, depending on the seasonal product line.

The BCMB has worked with Danone to ensure all products being manufactured and sold in Alberta are registered and deposit bearing. As is the case with all registered "ready to serve" beverages available for sale in the province, these containers are eligible for the applicable refund.

The containers registered by Danone use the following UPCs:

450ml Gable Top - 036632077493 and 946ml HDPE - 056800847932

When scanned using the Alberta Depot App, these containers will be listed as **Danone Inc. 450ml Gable Top Seasonal** and **Danone Inc. 946ml HDPE Seasonal**, regardless of the variation of the label. These can be accepted, and customers should receive their deposits. Please continue to utilize the QMS system if you have instances when you are not sure if a deposit should be given.

Examples of various labels:

If you have any questions, please email our registrations team - registrations@bcmb.ab.ca
