

EIA-805

WEEKLY BULK TERMINAL REPORT

YOUR RESPONSE IS REQUIRED BY LAW

This report is mandatory under Title 15 U.S.C. §772(b). Failure to comply may result in criminal fines, civil penalties and other sanctions as provided by Title 15 U.S.C. §797. Title 18 U.S.C. §1001 makes it a criminal offense for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious, or fraudulent statements as to any matter within its jurisdiction.

The Form EIA-805 must be completed by the operators of bulk terminals, blending plants, and end-user storage facilities selected by EIA. Companies are selected into the EIA weekly sample according to a procedure that assures coverage of 90 percent of each information element.

PURPOSE

The Energy Information Administration (EIA) Form EIA-805, *Weekly Bulk Terminal Report*, is used to collect data on the end-of-week stocks and blending activity of blending plants and terminals (including bulk terminals). Reportable blending activity includes blending and reclassification of gasoline, distillate fuel oil, kerosene, and kerosene-type jet fuel. The data appear on EIA's website at www.eia.gov and in the EIA publication, *Weekly Petroleum Status Report*.

RESPONSE DUE DATE

The Form EIA-805 must be received by EIA by 5 p.m. Eastern Time on the Monday following the end of the report period (e.g., the *Weekly Bulk Terminal Report* covering the week ending January 6, 2023, must be received by 5 p.m. Eastern Time January 9, 2023).

HOW TO FILE A RESPONSE

To facilitate the processing of data, the use of EIA forms is required. The form can be downloaded in XLS format on the EIA website, which can be accessed from <http://www.eia.gov/survey/#eia-805>.

Respondents must use the EIA's Secure File Transfer system to submit their data. With this Internet-based option, EIA uses security protocols to protect the information against unauthorized access during transmission. EIA does not accept email, fax, or paper forms.

Data Submission Method (see next page for step-by-step instructions)

By Secure File Transfer: <https://signon.eia.doe.gov/upload/noticeoog.jsp>

QUESTIONS

Please contact the EIA Survey Support Team using the following communication methods:

By email: eia4usa@eia.gov

By phone: 1-855-EIA-4USA (1-855-342-4872) [Monday through Friday, 8:00 AM to 6:00 PM E.T.]

HOW TO USE EIA'S SECURE FILE TRANSFER

EIA is ensuring the security of your transactions by using the latest Internet security technology. The technology being used to protect your data is encryption which is the scrambling of data into a code that is unreadable to anyone who does not have the key that deciphers it. The secure hypertext transfer protocol (HTTPS) is a communications protocol designed to transfer this encrypted information between computers over the internet. All information is protected by 128-bit encryption to maintain the privacy and confidentiality of your data. The only thing you need to take advantage of strong encryption technology is a secure browser, one that supports 128-bit encryption.

1. Go to the EIA Secure File Transfer system located at <https://signon.eia.doe.gov/upload/noticeoog.jsp>
2. Read the Agreement and then click the **Accept** button.
3. Enter your name, company name, phone number and email address into the boxes provided. Note that the email address is required so that we can send you a confirmation of the receipt of your data.
4. Click on the **Choose Files** button to navigate to your saved Excel file submission. Select the file to upload and click on the **Open** button.
5. If you are ready to submit your file, click on the green **Submit File(s)** button. Please be patient, it may take a few minutes to upload your file. Do not close your browser during this upload. A confirmation page will be displayed with a Submission Successful banner and indicate the names of the files you have transferred, a confirmation number and the date and time of the transfer.

SANCTIONS

The timely submission of Form EIA-805 by those required to report is mandatory under 15 U.S.C. §772(b), as amended. Failure to respond may result in a civil penalty of not more than \$10,633 each day for each violation. The government may bring a civil action to prohibit reporting violations which may result in a temporary restraining order or a preliminary or permanent injunction without bond. In such civil action, the court may also issue mandatory injunctions commanding any person to comply with these reporting requirements.

REPORTING BURDEN

Public reporting burden for this collection of information is estimated to average 1.44 hours per response, including the time of reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information including suggestions for reducing this burden to: Energy Information Administration, Office of Statistical Methods and Research, EI-21, 1000 Independence Avenue, S.W., Washington, DC 20585; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

DISCLOSURE OF INFORMATION

The information reported on this form will be protected and not disclosed to the public to the extent that it satisfies the criteria for exemption under the Freedom of Information Act (FOIA), 5 U.S.C. §552(b), the DOE regulations, 10 C.F.R. §1004.11, implementing the FOIA, and the Trade Secrets Act, 18 U.S.C. §1905.

The Federal Energy Administration Act requires EIA to provide company-specific data to other Federal agencies when requested for official use. The information reported on this form may also be made available, upon request, to another component of the Department of Energy (DOE); to any Committee of Congress, the Government Accountability Office, or other Federal agencies authorized by law to receive such information. A court of competent jurisdiction may obtain this information in response to an order. The information may be used for any nonstatistical purposes such as administrative, regulatory, law enforcement, or adjudicatory purposes.

Disclosure limitation procedures are not applied to the statistical data published from this survey's information. Thus, there may be some statistics that are based on data from fewer than three respondents, or that are dominated by data from one or two large respondents. In these cases, it may be possible for a knowledgeable person to estimate the information reported by a specific respondent.

Company specific data are also provided to other DOE offices for the purpose of examining specific petroleum operations in the context of emergency response planning and actual emergencies.

SPECIFIC INSTRUCTIONS

[Definitions](#) of petroleum products and other terms are available on our website. Please refer to these definitions before completing the survey form.

Quantities: Report using the following criteria:

- **Report** quantities to the nearest whole number in thousand barrels (42 U.S. gallons/barrel). Quantities ending in 499 or less are rounded down, and quantities ending in 500 or more are rounded up (e.g., 106,499 barrels are reported as 106 and 106,500 barrels are reported as 107).
- **Report** data for only those lines which are applicable to your operation. If the quantity for a product for which you usually report data is zero, please enter "0". Shaded cells on the form are those in which data are not currently required to be reported.
- **Report** quantities as of 7 a.m. Eastern Time Friday, which is the end of the report period, corrected to 60 degrees Fahrenheit (°F) less basic sediment and water (BS&W).

PART 1. RESPONDENT IDENTIFICATION DATA

- Enter the month, day, and year for which you are filing (e.g., January 6, 2023: Month 01 Day 6 Year 23). The weekly report period begins at 7:01 a.m. Eastern Time on Friday and ends at 7:00 a.m. Eastern Time on the following Friday.
- Enter the 10-digit EIA ID Number. If you do not have a number, submit your report leaving this field blank. EIA will advise you of the number.
- If there has been a change since the last report, enter an "X" in the block provided.
- Enter the name of the company filing the report.
- Enter the Doing Business As "DBA" name if appropriate.
- Enter the terminal site name.
- Enter the Terminal Control Number (TCN) used for identification of terminals and other facilities in the IRS ExSTARS system.
- Enter the physical address of the reporting company.
- Enter the mailing address of the Contact. (Note: If the physical address and mailing address are the same, provide the information only for the physical address.)
- Enter the name, telephone number, fax number and e-mail address of the person to contact concerning information shown on the report. The person listed should be the person most knowledgeable of the specific data reported.

PART 2: SUBMISSION/RESUBMISSION INFORMATION

Submission - Refer to the "How to File a Response" section for more details or method for submitting data.

Resubmission - A resubmission is required whenever an error greater than 5 percent of the true value is discovered by a respondent or if requested by EIA. Enter "X" in the resubmission box if you are correcting information previously reported.

Comments - Report any unusual aspects of your operations during the current reporting period in the Comments section at the bottom of the form below Parts 1 and 2 on the cover page. Comments will be used in the validation process and should address any data anomalies that could raise questions requiring contact by survey staff for clarification. Comments will be protected in the same manner as other information reported on this form as described in detail in "Disclosure of Information" in these instructions.

PART 3. BULK TERMINAL AND BLENDER ACTIVITY

Input

Report as input any finished product, blending component, oxygenate, or other product (including biofuels) blended or reclassified to a different product. Examples include: Reformulated Blendstock for Oxygenate Blending (RBOB) and Fuel Ethanol blended to produce Reformulated Gasoline Blended with Fuel Ethanol, and Kerosene blended with Distillate Fuel Oil.

Report input whether blending or product reclassification takes place due to transfers of products between tanks, through in-line blending systems, or by splash blending in trucks or rail cars.

Report as input any Distillate Fuel Oil to be reclassified to a different sulfur category as well as any Distillate Fuel Oil, Kerosene, or Kerosene-Type Jet Fuel being reclassified to a different Product code (see Reclassification of Inventory discussed later in these instructions).

Report gross input for each item listed on the survey form except where shaded. Do not “net out” inputs by reporting the difference between inputs and production.

Production

Report as production any finished product or blending component blended or reclassified from inputs reported on Form EIA-805. One example of production to report on Form EIA-805 is Reformulated Gasoline Blended with Fuel Ethanol blended from input of RBOB and Fuel Ethanol.

Report production whether blending or product reclassification took place due to transfers of products between tanks, through in-line blending systems, or by splash blending in trucks or rail cars.

Report as production any Distillate Fuel Oil reclassified from a different sulfur category as well as any Distillate Fuel Oil, Kerosene, or Kerosene-Type Jet Fuel reclassified from a different Product code (see Reclassification of Inventory discussed later in these instructions).

Report fuel ethanol production at the terminal only in the case of blending of denaturant (finished gasoline, motor gasoline blending components, or natural gasoline) with undenatured fuel-grade ethanol.

Report gross production for each item listed on the survey form except where shaded. Do not “net out” production by reporting the difference between production and input.

Total Input and Total Production

When Form EIA-805 is completed correctly, every input barrel should have a corresponding production barrel. Therefore, total input should equal total production reported for Product code 999. Small variances may exist due to rounding, measurement, gains, and losses, but reports with variances exceeding 5 thousand barrels should be checked for accuracy and will very likely prompt a follow-up call from EIA.

Ending Stocks

Report stocks as of 7 a.m. Eastern Time Friday, which is the end of the report period.

Report all Ending Stocks in custody at the terminal regardless of ownership. Reported stock quantities should represent actual measured inventories at the terminal plus any stocks in transit to the terminal (i.e., stocks in transit via rail, truck, or barge should be reported), excluding those in transit by pipeline. Petroleum products in transit by pipeline are reported by pipeline operators on Form EIA-802, *Weekly Product Pipeline Report*.

Report all domestic and foreign stocks held at terminals. Include foreign stocks only after entry through Customs. Exclude stocks of foreign origin held in bond.

For purposes of this report, “after entry through Customs” is said to occur on:

- the “entry date” specified in block 7 on the U.S. Customs and Border Protection CBP Form 7501, Entry Summary (the entry date for a warehouse withdrawal is the date of withdrawal);
- the “import date” specified in block 5 on the U.S. Customs and Border Protection CBP Form 214A (Statistical Copy), Application for Foreign Trade Zone Admission and/or Status Designation; or
- the “export date” specified in block 4 on the U.S. Department of Commerce Form 7525-V, Shipper’s Export Declaration, for shipments from Puerto Rico to the 50 States and the District of Columbia.

Reclassification of Inventory

Report a finished product that is reclassified as a different finished product as follows: the quantity of the original product is reported in the “Input” column and the reclassified product is reported in the “Production” column. For example, if you produce 10,000 barrels of kerosene during any given week and have it in storage at the end of the week, this quantity is to be reported as “Production” of Kerosene (Product code 311) on the weekly report. If during a subsequent week the intended use of the 10,000 barrels of kerosene is changed to Kerosene-Type Jet Fuel, report this reclassification by reporting the 10,000 barrels as “Input” of Kerosene (Product code 311) and as “Production” of Kerosene-Type Jet Fuel (Product code 213).

Biofuels and Natural Gas Liquids, TOTAL (Product code 003)

Includes inputs of all biofuels (including fuel ethanol and biodiesel), and all Natural Gas Liquids (including butane, isobutane, and natural gasoline) as found on Form EIA-815 as Product codes 141, 203, 205, 207, 244, 245 and 220.

Report inputs of Product code 003 as the sum of all inputs of the products listed above. For example, a terminal that blends 5,400 barrels of Fuel Ethanol with RBOB to make Finished Reformulated Gasoline Blended with Ethanol, blends 200 barrels of Butane to Conventional Gasoline not Blended with Fuel Ethanol to increase RVP, and blends 800 barrels of Biodiesel (B50-B100) with ULSD to make a B5 product would report the sum of the inputs of these three products (6,400 barrels) as a 6 on the report under Product code 003 Inputs.

Natural Gas Liquids (Product code 242)

Natural gas liquids include ethane, propane, butane, isobutane, and natural gasoline as found on Form EIA-815 as Product codes 108, 246, 626, 244, 245 and 220.

Report inputs of natural gas liquids as the sum of all inputs of the products listed above. In the example in the last section (see Biofuels and Natural Gas Liquids, TOTAL), would report the butane inputs (200 barrels) as a 0 on the report under Product code 242 Inputs.

Report Ending Stocks of total natural gas liquids as the sum of all the products listed above. Include fractionated and unfractionated products.

Report stocks of propane separately as product code 246. Include the propane component of unfractionated mixed products, (e.g. propane components of γ -grade, refinery-grade propylene, and butane-propane mixes), as well as all grades of fractionated propane (e.g. HD-5 propane and HD-10 propane). Exclude propylene.

Report stocks of Propane fractionated and ready for sale as product code 626. Include fractionated propane ready for sale (e.g. HD-5 propane and HD-10 propane) but exclude the propane component of unfractionated mixed products. Also exclude propylene. Propane, fractionated and ready for sale is a subset of total propane (product code 246).

Biofuels Blending

If biofuel is blended at the terminal with distillate fuel oil to make a finished distillate blend (B5, B20, etc.) report the activity as follows:

Report the quantity of Biofuel (equivalent to Product code 203 or 205 on the monthly Form EIA-815) as part of the Product code 003 inputs.

Report the quantity of the distillate fuel oil (Product Code 465, 466, or 467) being blended with biodiesel as inputs of Product code 465.

Report the quantity equal to the inputs of the biofuel and distillate as production of Product code 465, 466, or 467. Example: if during the reporting week you have blended 5,000 barrels of Biodiesel (B100) with 95,000 barrels of ULSD (Product code 465) to make 100,000 barrels of a B5 blended diesel, report 5 as part of your Product code 003 inputs, report 95 as Product code 465 inputs, and report 100 as Product code 465 production.

Gasoline Treated as Blendstock (GTAB) (Product code 117)

If GTAB is tested at the terminal and is certified as a finished motor gasoline where no further blending or treatment is required, such as adding oxygenates, report GTAB as follows:

Report the quantity of GTAB that is certified as a finished product as an input of "GTAB".

Report an equal volume of the appropriate finished motor gasoline as a "Production" of the finished motor gasoline after it has been certified.

Report input of GTAB and other material such as Fuel Ethanol and then production of Finished Motor Gasoline or another Motor Gasoline Blending Component in cases where GTAB is blended with another material to produce a new product.

Transmix

Transmix is created when two different petroleum products (e.g., motor gasoline and distillate fuel oil) become commingled during pipeline transport. **Exclude** transmix from all quantities reported on Form EIA-805. Transmix should not be reported as unfinished oils (EIA Product code 812).

Some terminals have the capability to process transmix and recover finished products or blending components. In this case, exclude the transmix but report finished products or blending components from transmix processing as receipts at the terminal. The receipts may be blended to produce finished products, shipped from the terminal, or added to inventory.
