

EIA-814 MONTHLY IMPORTS REPORT

YOUR RESPONSE IS REQUIRED BY LAW

This report is mandatory under Title 15 U.S.C. §772(b). Failure to comply may result in criminal fines, civil penalties and other sanctions as provided by Title 15 U.S.C. §797. Title 18 U.S.C. §1001 makes it a criminal offense for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious, or fraudulent statements as to any matter within its jurisdiction.

The Form EIA-814 must be completed by each Importer of Record (or Ultimate Consignee in some situations regarding Canadian imports) who imports crude oil or petroleum products:

- into the 50 States and the District of Columbia,
- into Puerto Rico, the U.S. Virgin Islands and other U.S. possessions (Guam, Midway Islands, Wake Island, American Samoa, and Northern Mariana Islands,
- into Foreign Trade Zones located in the 50 States and the District of Columbia, and
- from Puerto Rico, the U.S. Virgin Islands and other U.S. possessions into the 50 States and the District of Columbia.

Canadian Imports

When crude oil or petroleum products are imported from Canada and when the importer of record is a Canadian company, the Ultimate Consignee must report imports on the EIA-814. For example, when a Canadian shipper is listed as the Importer of Record in Block 26 of the U.S. Customs and Border Protection Form CBP 7501, *Entry Summary*, the company listed as the Ultimate Consignee shown in Block 25 of the CBP 7501 must report on the EIA-814.

PURPOSE

The Energy Information Administration (EIA) Form EIA-814, *Monthly Imports Report*, is used to collect data on imports of crude oil and petroleum products. A summary of the data appears on EIA's website at <http://www.eia.gov/> and in numerous government publications.

RESPONSE DUE DATE

The Form EIA-814 must be received by EIA by the 20th calendar day following the end of the report period (e.g., the Form EIA-814 covering the January report period must be received by February 20th).

HOW TO FILE A RESPONSE

Respondents should transmit data using Secure file transmission (HTTPS). Secure transmission is an industry standard method to send information over the internet using encrypted processes. The secure hypertext transfer protocol (HTTPS) is a communications protocol designed to transfer encrypted information between computers over the Internet.

Copies in spreadsheet format (XLS) are available on EIA's website. You may access the materials here:

<https://www.eia.gov/survey/#eia-814>

Files must be saved to your personal computer. Data cannot be entered interactively on the website. EIA does not accept email, fax, or paper forms.

Data Submission Method

By Secure File Transfer: <https://signon.eia.doe.gov/upload/noticeoog.jsp>

QUESTIONS

Please contact the EIA Survey Support Team using the following communication methods:

By email: eia4usa@eia.gov

By phone: 1-855-EIA-4USA (1-855-342-4872) [Monday through Friday, 8:00 AM to 6:00 PM E.T.]

HOW TO USE EIA'S SECURE FILE TRANSFER

EIA is ensuring the security of your transactions by using the latest Internet security technology. The technology being used to protect your data is encryption which is the scrambling of data into a code that is unreadable to anyone who does not have the key that deciphers it. The secure hypertext transfer protocol (HTTPS) is a communications protocol designed to transfer this encrypted information between computers over the internet. All information is protected by 128-bit encryption to maintain the privacy and confidentiality of your data. The only thing you need to take advantage of strong encryption technology is a secure browser, one that supports 128-bit encryption.

1. Go to the EIA Secure File Transfer system located at <https://signon.eia.doe.gov/upload/noticeoog.jsp>
2. Read the Agreement and then click the **Accept** button.
3. Enter your name, company name, phone number and email address into the boxes provided. Note that the email address is required so that we can send you a confirmation of the receipt of your data.
4. Click on the **Choose Files** button to navigate to your saved Excel file submission. Select the file to upload and click on the **Open** button.
5. If you are ready to submit your file, click on the green **Submit File(s)** button. Please be patient, it may take a few minutes to upload your file. Do not close your browser during this upload. A confirmation page will be displayed with a Submission Successful banner and indicate the names of the files you have transferred, a confirmation number and the date and time of the transfer.

SANCTIONS

The timely submission of Form EIA-814 by those required to report is mandatory under 15 USC 772(b), as amended. Failure to respond may result in a civil penalty of not more than \$10,633 each day for each violation. The government may bring a civil action to prohibit reporting violations which may result in a temporary restraining order or a preliminary or permanent injunction without bond. In such civil action, the court may also issue mandatory injunctions commanding any person to comply with these reporting requirements.

REPORTING BURDEN

Public reporting burden for this collection of information is estimated to average 1.35 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information including suggestions for reducing this burden to: Energy Information Administration, Statistical Methods and

Research, EI-21, 1000 Independence Avenue, S.W., Washington, D.C. 20585; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503.

DISCLOSURE OF INFORMATION

Information reported on Form EIA-814 will be considered public information and may be publicly released in company or individually identifiable form and will not be protected from disclosure in identifiable form.

GENERAL INSTRUCTIONS

[Definitions](#) of petroleum products and other terms are available on the EIA website. Please refer to these definitions before completing the survey form.

Quantities: Report using the following criteria:

Report quantities to the nearest whole number in **thousand barrels** (42 U.S. gallons/barrel). Quantities ending in 499 or less are rounded down, and quantities ending in 500 or more are rounded up (e.g., 106,499 barrels are reported as 106 and 106,500 barrels are reported as 107).

Report data for only those lines which are applicable to your operation. If the quantity for a product for which you usually report data is zero, please enter "0". Shaded cells on the form are those in which data are not currently required to be reported.

Report quantities corrected to 60 degrees Fahrenheit (°F) less basic sediment and water (BS&W).

SPECIFIC INSTRUCTIONS

PART 1: RESPONDENT IDENTIFICATION DATA

- Enter the year and month on each page. The monthly report period begins at 12:01 a.m. EST on the first day of the month and ends midnight of the last day of the month.
- Enter the 10-digit EIA ID Number. If you do not have a number, submit your report leaving this field blank. EIA will advise you of the number.
- If there has been a change since the last report, enter and "X" in the block provided.
- Enter the Doing Business As "DBA" name if appropriate.
- Enter the name of the importer of record.
- Enter the physical address of the reporting company.
- Enter the mailing address of the Contact. (Note: If the physical address and mailing address are the same, provide the information only for the physical address.)
- Enter the name, telephone number, facsimile number, and e-mail address of the person to contact concerning information shown on the report. The person listed should be the person most knowledgeable of the specific data reported.

PART 2: SUBMISSION/RESUBMISSION INFORMATION

Submissions: Refer to the "How to File a Response" section for more details for submitting data.

Resubmissions: A resubmission is required whenever an error greater than 5 percent of a previously reported value is discovered by a respondent or if requested by EIA. In addition, resubmit Form EIA-814 whenever descriptive information (i.e., port of entry, country of origin, product description, sulfur, API gravity, processing company name and facility name) is added or changed.

Report on the Imports Activity Detail page only the affected line(s) giving the revised data and using the same line number(s) used in the original submission. Then complete and submit a revised Imports Activity Summary. Complete the EIA ID number, the report period, contact information and enter "X" in the resubmission box if you are correcting information previously reported.

COMMENTS

Report any unusual aspects of your operations during the current reporting period in the Comments section below Parts 1 through 3.

PART 3. IMPORTS ACTIVITY SUMMARY

The "Total Number of Line Entries" and the "Total Quantity" of the imports reported in Part 4 will be auto calculated.

PART 4. IMPORTS ACTIVITY DETAIL

Shipments may be summarized and entered on one line if all the information (other than quantity) is the same for more than one shipment. Otherwise, report each shipment on a separate line. Do not report any shipment or combined shipments with a quantity less than 500 barrels for the report month.

Report imports for the report month of entry through Customs. For purposes of this report, "entry through Customs" is said to occur on:

- the "entry date" specified in block 7 on the U.S. Customs and Border Protection CBP Form 7501, Entry Summary (the entry date for a warehouse withdrawal is the date of withdrawal);
- the "import date" specified in block 5 on the U.S. Customs and Border Protection CBP Form 214A (Statistical Copy), *Application for Foreign Trade Zone Admission and/or Status Designation*; or
- the "export date" specified in block 4 on the U.S. Department of Commerce Form 7525-V, *Shipper's Export Declaration*, for shipments from Puerto Rico to the 50 States and the District of Columbia.

Report imports of Crude Oil and Crude Oil for Delivery to U.S. Strategic Petroleum Reserve as imports of crude oil (Code 020). Identify the processor as the Strategic Petroleum Reserve site where the crude oil will be stored.

Report all imports using the above instructions to determine the import date regardless of availability of processing company and processing facility information. See following instructions for reporting processing facilities.

Report imports into the 50 States and the District of Columbia as individual import transactions.

Report imports **from** Puerto Rico, the U.S. Virgin Islands, and other U.S. possessions.

Report imports **into** Puerto Rico, the U.S. Virgin Islands and other U.S. possessions as separate transactions. For example, imports of crude oil into Puerto Rico and the U.S. Virgin Islands should be reported using the producing country as the "Country of Origin" and a port in Puerto Rico or the U.S. Virgin Islands as the "Port of Entry." Products shipped from Puerto Rico or the U.S. Virgin Islands to the 50 States or the District of Columbia should also be reported, with Puerto Rico or the U.S. Virgin Islands as the "Country of Origin" and a port in the 50 States or the District of Columbia as the "Port of Entry."

Foreign Trade Zones

Crude oil that is imported into a Foreign Trade Zone within the 50 States or the District of Columbia should be reported as an import of crude oil, not as imports of the products produced from refining the crude oil.

Bonded Storage

Report imports that enter bonded storage **only when** they are withdrawn from storage either with duty paid for domestic consumption (e.g., KEROJ for kerosene-type jet fuel) or withdrawn free of duty for use as fuel for vessels and aircraft engaged in international trade (e.g., BKERJ for bonded kerosene-type jet fuel). Refer to Table 1 for special commodity codes to be used for petroleum products withdrawn from bonded storage for use in international trade.

For Each Line of the Imports Activity Detail, report:

Type of Commodity: Select the appropriate commodity from the drop-down list. Table 1 displays the corresponding code to use on the EIA-804, Weekly Imports Report, e.g., Ethane should be reported under product Code 250 on the EIA-814 but should be reported on the EIA-804 under product Code 242 (Natural Gas Liquids and Refinery Olefins).

Report products, other than crude oil, intended for refinery processing as unfinished oils. Refinery processing includes distillation, cracking, reforming, isomerization, polymerization, treating, and similar processes but excludes blending. Products such as motor gasoline blending components, fuel ethanol, and aviation gasoline blending components that only require blending have their own product codes. Unfinished oils are classified as naphthas and lighter oils (Code 820), kerosene and light gas oils (Code 830), heavy gas oils (Code 840), and residuum (Code 850). Unfinished oils are a classification used when reporting to EIA, but they are not a product classification used when reporting to U.S. Customs and Border Protection using codes from the Harmonized Tariff Schedule. Therefore, certain products may be classified differently when reported to EIA and U.S. Customs and Border Protection.

Port of Entry: Select the port of entry from the drop-down list. If it is not listed, write in the port of entry. Alternatively, enter the four-digit code for the port at which the commodity was unloaded. Refer to Table 2 for valid ports of entry.

Country of Origin: Select the country from which the crude oil was produced, or petroleum products originated. In the case of crude oil, report the original producing country, not any intermediate trans-shipping source. If it is not listed, write in the country of origin.

Quantity: Enter the quantity of the commodity imported in **thousand barrels**. Quantities are to be corrected to 60°F less BS&W.

Sulfur Percent by Weight: Enter the sulfur percent by weight rounded to two decimal points (e.g., 1.28) for crude oil and residual fuel oil.

API Gravity: Enter the API Gravity rounded to two decimal points (e.g., 26.71) for crude oil only. API Gravity must be between zero and 70.

Name of Processing Refinery: If applicable (not grayed out) and known, select the processing refinery regardless of whether it is your refinery or another refinery for crude oil and unfinished oils only. If it is not in the drop-down list, write in the processing refinery. Every effort should be made to identify processing refinery names. However, if a processing refinery name cannot be identified at the time Form EIA-814 is submitted to EIA, select "Unknown-<state>" as the processing refinery name and continue efforts to identify unknown processing refinery names. Resubmit Form EIA-814 whenever an unknown processing refinery is identified.

Location of Processing Facility: Select the location (U.S. City and State) of the processing facility (refinery) for crude oil and unfinished oils only. As with the processing refinery names, every effort should be made to identify processing facility locations. If the location is not listed, write in the location. If the refinery name was entered as "Unknown-<state>", this cell will be grayed out and should be left blank. Continue efforts to determine processing facility locations and resubmit Form EIA-814 whenever an unknown processing facility is identified.

Note: The option is available to enter the Terminal Control Number (TCN) in place of the location of the processing facility (refinery). The TCN is used for identification of refineries and other facilities in the IRS ExSTARS system.

Instructions for Specific Products

Refer to Table 1 “Commodity Names and Product Codes” of these instructions for information on product classifications. In some cases, products are classified according to their intended end use. For example, naphtha must be reported as gasoline blending components, special naphtha, petrochemical feedstocks, or unfinished oils depending on intended use.

Exclude any products, such as finished petrochemicals, not listed on table 1 from Form EIA-814.

Report all imports of fuel ethanol (Code 141) intended for blending into gasoline. Include both denatured and undenatured fuel ethanol intended for blending into gasoline.

Motor Fuels

Report finished **reformulated** motor gasoline blended with fuel ethanol that contains greater than 0% but less than or equal to 50% denatured fuel ethanol by volume as Reformulated gasoline blended with fuel ethanol (Code 125).

Report finished motor gasoline blended with fuel ethanol that contains 55% denatured fuel ethanol or less by volume as Conventional, Blended with Fuel Ethanol Ed55 and Lower (code 166).

Report finished motor gasoline blended with fuel ethanol that contains greater than 55% denatured fuel ethanol by volume as Conventional, Blended with Fuel Ethanol Greater than Ed55 (code 149). All or most of the gasoline reported in this product category will be E85.

Table 1. Commodity Names and Product Codes

Commodity Description (An asterisk (*) indicates that name and location of processing company is required on the EIA-814)	EIA-814 Product Code	EIA-804 Product Code
Crude Oil *	020	020
Crude Oil for Delivery to U.S. Strategic Petroleum Reserve*	020	024
Biofuels and Fuels from Non-Biogenic Waste		
Biodiesel	203	666
Fuel Ethanol	141	141
