

Fire Industry Association
Export Council

FIA Exporters Directory

The UK Fire Protection Industry is recognised across the globe for its quality products and engineering expertise.

FIA Exporters are part of the Fire Industry Association and comprise a range of organisations within the UK fire protection and fire safety industries.

Some are smaller companies wishing to enter overseas markets for the first time, or looking to expand their export interests. Others are larger world-leading companies that acknowledge the benefits of working together within the FIA to promote UK products, services and standards.

They are represented collectively by the FIA Export Council, an elected body which meets quarterly to discuss FIA Exporting Members' activities and determine the priorities to be pursued.

Recent activities have included fire-specific Market Reports on South Africa and Turkey and overseas trade mission to South Africa and Brazil. We are also active members of the UK's Joint International Fire Board and work closely with DIT DSO, including inputting into their forthcoming Export Strategy.

THE FIA EXPORT COUNCIL

- Export focal point for the British Fire Industry
- Promoting British Fire Safety Excellence internationally
- A DIT Trade Challenge Partner and Member of the Joint International Fire Board
- Assisting members in maximising their export capabilities

WHY SELECT AN FIA EXPORTER?

- Members of the Fire Industry Association, the UK's leading fire safety trade body
- World leaders in fire safety
- Historical pedigree with modern approaches
- Best practice in fire safety, business integrity and ethics
- Quality and innovation
- Recognised standards, approvals and certifications
- Full range of fire safety solutions
- Cultural awareness

For more information about the FIA Export Council go to www.fia.uk.com

ADVANCED ELECTRONICS LTD

EXTINGUISHING FD&A VOICE SYSTEMS EMERGENCY LIGHTING

Advanced's range of analogue addressable alarm panels, is regarded as a benchmark product across the fire industry and is widely specified for installations from single loop, single panel to wide, multi-loop networks with 100,000s devices. Advanced also produces intelligent extinguishant, radio paging and emergency lighting systems, all backed up by industry leading expertise, service and the strictest quality control standards.

Advanced supplies its products in over 60 countries worldwide to a range of local and international standards including EN54 and UL864 9th Edition. It has offices in the UK, US and Dubai and representation in territories worldwide. Advanced also offers a bespoke design and build service, AdSpecials while Advanced's customer service and support, Advanced 360, is legendary for its quality. Advanced systems are installed in all manner of locations worldwide from small buildings to some of the most challenging and prestigious locations available.

APRECO LTD

PRESSURE RELIEF/DAMPERS

Apreco exports globally and is at the forefront of vent design in the fire suppression industry. We are market leaders and were the world's first vent manufacturer to be EWCL5 Certified.

Apreco fire suppression vents provide protection against over-pressure in the case of inert gas systems such as IG-55 and Inergen and under-pressure venting with gases such as FM200 and NOVEC 1230. Our vents are manufactured in a number of standard sizes for installation in both internal and external walls and can be powder coated in a range of RAL colours and finishes, providing market leading performance across a range of pressures.

Ardent

Vehicle fire protection

ARDENT LTD

EXTINGUISHING SYSTEMS

At Ardent, we specialise in fire suppression systems for mobile and static plant. We have been in business for over 25 years and to date we have installed systems on over 9,000 items of plant from forklift trucks to 1000 t excavators. We work with companies ranging from multinational mining corporations to local recycling centres in a variety of sectors including mining, recycling and waste processing, ports and wood processing to help improve safety, minimise downtime and maximise productivity for their businesses.

With office and business partners in Europe and Africa, and customers across Europe, Africa, Middle East and Asia, we strive to deliver the best continuous local support to our customers wherever they operate. Our flexibility allows us to provide our customer with the best option for support and maintenance. We are ISO 9001, 14001 and 18001 certified and approved by several other organisations that focus on quality and health and safety.

Britannia Fire Ltd

Britannia Fire Limited is an independent producer of fire extinguishers that started manufacturing in Ashwellthorpe, Norfolk in the 1970s. The company has accreditation to the highest standards and is monitored on a regular basis by independent quality organisations.

We have established a strong presence in the UK and export to all corners of the world, providing oil rig protection, chemical, petrochemical and marine markets. Product development has always been at the heart of the company, keeping pace with customer requirements and using the latest production techniques. Our own fire ground, which is available for outside use, allows us to test new products.

People are the backbone of any successful business and our teams in sales, technical and manufacturing have a mass of experience which they use to give total customer satisfaction.

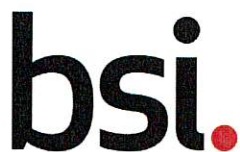

Our product ranges can be seen on our website: Britannia, Blazex, Norfolk, P50 – the new and innovative composite extinguisher.

BRITISH STANDARDS INSTITUTION

APPROVALS/CERTIFICATION

BSI (British Standards Institution) is the business standards company that equips businesses with the necessary solutions to turn standards of best practice into habits of excellence. We facilitate the development of standards and help businesses demonstrate continued excellence through third-party certification of their products and processes.

The voluntary BSI Kitemark, unique to BSI, is recognised globally as a trusted mark of safety and quality, and helps our clients export to many countries, including the UAE, Oman, Qatar, Kuwait and Saudi Arabia. Our fire detection and suppression laboratories are UKAS accredited, which means we are audited to the highest standards, and is one of the reasons why clients choose our testing and certification services, along with our reputation for excellent service delivery and comprehensive test reports. We're also a Notified Body for many European Directives.

DAB FIRE ENGINEERING LTD

EXTINGUISHING SYSTEMS

Specialising in the design and manufacture of fire protection equipment including fixed fire extinguishing systems and mobile fire suppression systems for a range of vehicles such as off-road mobile plant, buses/coaches and rolling stock. Our products and components are pieces of fine-tuned precision engineering. We benchmark ourselves against the best for reliability and effectiveness then ensure that anything carrying the DAB name sets new standards.

Our systems and components are built and tested in the UK using materials and parts of the highest quality. Our CO₂ cylinder valves, actuators and other components, which have become known worldwide for their reliability, are used by some of the largest names in the fire protection industry. Based at our headquarters in Roelcliffe near York, our responsive and agile team strive to offer the best service when it comes to delivery, back-up and support.
