

Finastra LaserPro is now available in the cloud

LaserPro cloud provides financial institutions with industry-leading compliant document creation capabilities and the future-ready benefits of cloud.

LaserPro, the document generation solution of choice for over 3,400 financial institutions, now delivers expanded functionality in the cloud."

For decades, LaserPro has been the document generation solution of choice for financial institutions, providing a competitive advantage through streamlined procedures, the ability to handle any loan type, and guaranteed compliance.

Today, the benefits of LaserPro are enhanced through a cloud solution offering greater flexibility and scalability with reduced technology burden.

With the cloud version of LaserPro, these elements are augmented through a modern user experience with intuitive workflows with enhanced security.

Streamlined performance

Whether just looking to replace a current document generation system with a cloud solution, or also needing the ability to better integrate with other hosted solutions through APIs, LaserPro has you covered. Coupled with the lower total cost of ownership, reduced technology burden, accessibility from anywhere, and elimination of having to manage another system and required periodic updates, LaserPro cloud enables you to better service customers and devote more resources to growing revenue.

Laserpro cloud provides a modern user experience with web-based navigation, intuitive workflows, and enhanced data security. It is extensible with open APIs and also utilizes the Finastra 50-state network of legal counsel to ensure compliance at both the federal and state levels.

LaserPro cloud enables clients to solve their lending needs with one partner. You can grow your lending business and the solution scales with your needs. LaserPro is the most-used document generation solution in the U.S. with over 35 years in the market. The cloud offering provides the same robust capabilities.

Cloud-native design

Reduced technology burden

Modern user experience

Trusted

One partner, one solution

LaserPro brings you competitive advantage in the cloud

LaserPro cloud reduces a financial institution's technology burden to gain a competitive advantage.

The lending environment is changing, welcoming an ever-growing stream of digitally-enabled competitors at a time when borrowers expect a faster and simpler lending process. As lending costs rise and margins slim, traditional financial institutions need an edge against new entrants, one that meets borrower expectations for faster funding, while providing greater traction against rising expenses.

Finastra's LaserPro cloud offering provides access from anywhere on any device in order to meet borrower expectations, maintain market share and grow into the future.

Lower capital expenditures and maintenance costs

Cloud solutions eliminate the need for on-premise architecture and servers, reducing your up-front capital requirements. Deployment and maintenance also take place in the cloud, eliminating expenses related to installation, integration, testing, upgrades and maintenance, also allowing for better allocation of your IT resources.

Ease of ownership

You no longer need to worry about servers or scheduling time during off hours to upgrade to the latest version.

Innovation on Tap

LaserPro integrates with many third-party services, allowing you to meet consumer expectations for speed and digital functionality. You're also unlocking the door to Finastra's innovation marketplace, delivering a wide range of pre-integrated applications to extend LaserPro's native functionality with faster time to value.

It's all of the benefits of LaserPro, now accessible through a modern updated user interface.

Realize a reduced technology burden, modern user experience, and an all-encompassing solution that extends beyond today for a more profitable future.

Improved efficiency boosts time to close

LaserPro cloud offers ever-ready access through any standard web-browser from any device. Loan officers can now seamlessly coordinate with back-office staff and respond more quickly to borrowers, by accessing and managing loan documents from anywhere.

Tighter data security

Web-based access is simple and secure with encryption protocols designed to safeguard data. Additional firewalls, redundant ISO certified data centers, and regular audits also enhance security. And because LaserPro is built on Azure technology, you'll have the full weight of Microsoft's experience to keep your documents and customer information secure and always available.

About Finastra

Finastra is a global provider of financial software applications and marketplaces, and launched the leading open platform for innovation, FusionFabric.cloud, in 2017. It serves institutions of all sizes, providing award-winning solutions and services across Lending, Payments, Treasury & Capital Markets and Universal Banking (digital, retail and commercial banking) for banks to support direct banking relationships and grow through indirect channels, such as embedded finance and Banking as a Service. Its pioneering approach and commitment to open finance and collaboration is why it is trusted by ~8,600 institutions, including 90 of the world's top 100 banks. For more information, finastra.com
