Tap Into Efficiency

Take your business everywhere. Manage calls from anywhere.

Stay connected to your customers no matter where you are with FluentStream Mobile, the communications app built especially for small and medium business users.

- **Stay connected everywhere.** Airport, taxi, coffee shop? No problem! With FluentStream Mobile, the world is your office.

- **Never miss a beat.** Stay connected your way with SMS, Calling and Voicemail all in one app.

- **Get in sync.** No more saving business contacts to your cell phone. Our advanced contacts system lets you sync contacts from the web portal to your app and share contacts instantly.

- **Never miss an important call.** With push notifications, inbound and outbound calling, and call forwarding, you can ensure that no call goes unanswered.

- **See voicemails at a glance.** Tired of dialing into your voicemail? FluentStream Mobile offers Visual Voicemail so you can find important messages quickly.

More Feature Highlights:

Call Forwarding
Need to manage call forwarding settings on the go? FluentStream Mobile makes it easy for users to enable, modify and turn off call forwarding.

Business Caller ID
No more blending personal calls with business. With FluentStream Mobile, your business name will appear to customers even when you're using your mobile phone.
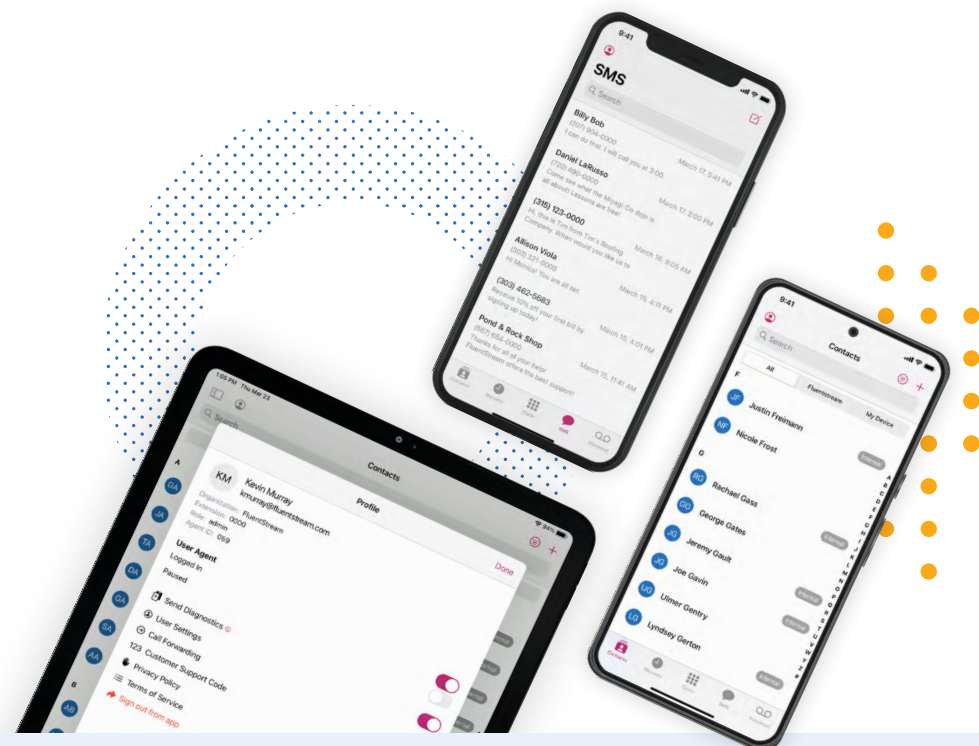

Business Text Messaging
Don't have time for a call? FluentStream Mobile allows you to send and receive text messages.

Recent Call History
Whether you make a call from your desk phone or using the app, our recent call history feature keeps you on top of your business interactions.
