

# Empower your Team with FluentStream for Microsoft Teams

Unlock seamless communication with calling, video, fax and more within your Microsoft Teams environment.

## Microsoft Teams, Powered by FluentStream

FluentStream operates in the background to support dependable calling while users interact with the familiar Teams interface

## A Single Provider and Number Does It All

Only one trusted provider and phone number is needed to call, chat, video conference, have calendar access, fax, analyze reports, and more. Microsoft Teams integrates seamlessly into FluentStream's hosted phone system to monitor productivity without adding another tool to your workflow.

## Seamless Integration Across All Devices

Manage all of your phone capabilities within Microsoft Teams on your desktop and the mobile app. Plus, your desk phone will operate as usual.

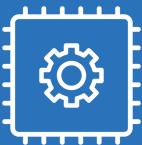

## Keep Business and Personal Numbers Separate

Make phone calls from the Teams app without ever needing to give out your personal phone number.

## Ease of Use For Admins

Access to Administration Tools

Rapid Response from FluentStream Support

Advanced Call Analytics
