

GlobalSign PKI Disclosure Statement

Date: April 28, 2021

Version: v1.3

Introduction

This document is the PKI Disclosure Statement, as required by European standard ETSI EN 319 411-1, related to the certification service offered by the Trust Service Provider GlobalSign NV/SA., a Belgian company with VAT number BE0459.134.256 and by the Trust Service Provider GMO GlobalSign Ltd., a UK company with VAT number GB 812 4412 68.

In the following, the certification service is also referred to by “CA service” (Certification Authority).

The REGULATION (EU) No 910/2014 OF THE EUROPEAN PARLIAMENT AND OF THE COUNCIL of 23 July 2014 “on electronic identification and trust services for electronic transactions in the internal market and repealing Directive 1999/93/EC” is referred to by “eIDAS Regulation (“eIDAS”).”

eIDAS (UK Legislation) and The Electronic Identification and Trust Services for Electronic Transactions Regulations 2016 is referred to by “UK eIDAS”.

The purpose of this document is to summarise the key points of the CA service for the benefit of Subscribers and Relying Parties. This document does not substitute or replace the Terms and Conditions of the CA service nor the Certification Practice Statement (CPS) published on the CA website (see further on).

Due to the nature of revocation requests and the need for efficiency, GlobalSign provides automated mechanisms for requesting and authenticating revocation requests. The primary method for Subscribers is through the GCC account used to issue the Certificate that is requested to be revoked. Anti-Malware Organizations, Subscribers, Relying Parties, Application Software Suppliers, and other third parties may report suspected Private Key Compromise, Certificate misuse, Certificates used to sign Suspect Code, Takeover Attacks, or other types of fraud, compromise, misuse, inappropriate conduct, or any other matter related to Certificates by sending email to: report-abuse@globalsign.com.

Certificate Types, Validation Procedures and Usage

GlobalSign issues **qualified certificates** according to European standard ETSI EN 319 411 and other related standards. Certificates are offered to the general public (private companies, public entities, professionals, private persons, etc.), at the conditions published on the CA website.

All certificates are signed with at minimum a hashing function of SHA-256. For further information on the supported certificate policies (e.g., their respective OIDs and other features) see the documentation published on the CA website at <https://www.globalsign.com/repository/>.

The certificates of GlobalSign NV issuing CAs are published on the CA website and on the website of FPS Economy, SMEs, Self-employed and Energy - Quality and Safety at <https://tsl.belgium.be/> (see the “Trusted List”).

Certificates issued from these CAs can be identified by the following Policy Identity OIDs:

To allow validation of certificates, GlobalSign offers an on-line status checking service based on the OCSP standard and may offer Certificate Revocations List (CRL). The relevant URLs will be included in each certificate, respectively in either/both the AuthorityInformationAccess and CRLDistributionPoints extensions.

Reliance Limits

See Section 9.8 of the CPS.

Subscriber's Obligations

The certificate subscriber must:

- provide complete, accurate and truthful information to the CA at the time of certificate request.
- use its private keys only for the purposes and in the ways allowed by the CPS.
- adopt suitable measures to prevent any non-authorized use of its private keys.
- (for certificates that require use of a signature device) if it generates its private key by itself, generate it within a signature device approved by the CA.
- up to the date of certificate expiration, promptly inform the CA in the following cases:
 - any loss, theft, or damage of its signature device.
 - any loss of the exclusive control of its private key, e.g., because of compromise of the activation data (e.g., PIN) of its signature device.
 - any information contained in its certificate is inaccurate or no longer valid:
- in the case of compromise of its private key (e.g., because the PIN of its signature device gets lost or disclosed to non-authorized people), immediately cease any use of such private key, and make sure that it will no longer be used.
- should subscriber re-use a hardware token they must ensure it is both qualified (QSCD) and seek approval for its use in advance from GlobalSign

For further information, please refer to the GlobalSign CPS.

Certificate Status Checking Obligations of Relying Parties

Any natural person, legal person or entity relying on the information contained in certificates (in short, "Relying Parties") must verify that certificates are not suspended or revoked. Such verification can be performed by consulting the list of revoked certificates (CRL) published by the CA or by querying the OCSP service provided by the CA, at the addresses (URLs) contained within the certificate themselves.

Limited Warranty and Disclaimer/Limitation of Liability

For warranty and liability limitations, please refer to the Terms and Conditions of the Qualified CA service published on the GlobalSign website at <https://www.globalsign.com/repository/>.

Applicable Agreements, CPS/CP

The agreements and conditions applying to the CA service are found in the following documents, published on the GlobalSign website at <https://www.globalsign.com/repository/>:
