Your health and support services start here

Your total health needs are our priority

At Latrobe Community Health Service, we provide health services, treatment, and support. We want everyone to lead healthier, happier lives.

When we provide services, we treat you as a whole person.

We offer services to support and care for you in many ways, including GP services, counselling, carer support, dental services and more.

Sometimes, you may only need to access a service once. At other times, you may need ongoing treatment or help; we can guide you through this.

Who can access our services?

Everyone is welcome to contact us to find out about services they may want to use. Eligibility criteria may apply for some services.

If you need an interpreter, please tell front office staff when you book an appointment.

We need up to 48 hours notice to book the translating and interpreter service.

When are services available?

Most of our services are available Monday to Friday, from 8.30am to 5pm. However, some services take place after-hours or in our clients' homes.

How much do our services cost?

You may have to pay for some services, while others are free if you meet eligibility criteria. Your private health insurer may contribute to some services.
