SHHH...NICE! SILENCE AND COMFORT FOR ALL THE ENVIRONMENTS

The new Era Inn system is born! Era Inn is the smart and versatile new system for optimising natural light and maximising energy efficiency in buildings.

Designed to be extremely silent, Era Inn is the perfect choice for all kinds of project: residential, commercial, offices, hotels and public spaces like schools, hospitals and medical centres.

A complete range for automating interior blinds and projection screens to grant the well-being in all indoor environments.

Era Inn: one system, INNfinite solutions.

ERA INN, FOR PEOPLE ...

Silent: minimal vibrations during opening and closing guarantee the highest level of **acoustic comfort**. **Soft Start** and **Soft Stop** functions electronically controlled for setting acceleration and deceleration levels on approach to limit switches.

Comfort: perfect alignment under all load conditions, during opening and closing, even in multi-motor installations involving different size blinds and rollers.

Intelligent, thanks to the obstacle detection.

Design and customisation: a wide range of control devices to fit any lifestyle.

Easy to install and use: pushbuttons for quick and precise limit switch adjustments and two-colour diagnostic LEDs on the motor head.

InnovAction

The Nice Era Inn system was recognised as the **most innovative product** at the R+T Shanghai 2016 exhibition and won the **InnovAction Award**.

QUALITY

Nice products stand out for their advanced electronics, aesthetic quality and attention to detail. Nice tubular motors are designed and made in Italy, in the Nice R&D Technology Centre, by a highly qualified specialised team.

To consolidate its top quality production of automation systems for interior and exterior blinds, Venetian blinds and sunscreens in general, Nice has begun building a new production facility in Germany, in the pioneering industrial district of Stuttgart. The aim is to integrate made-in-Italy creativity with the made-in-Germany philosophy of quality, to focus on a more exhaustive home comfort offer.

GUARANTEE

Safety and reliability are fundamental values for Nice:

in its 1000 sq m laboratories, Nice tests its products rigorously and precisely, following procedures at the forefront of technology and using the most advanced instruments available to guarantee maximum technological and quality standards.

The Nice tubular motors are controlled and tested to give you a long-term guarantee: 5 years* from the production date indicated on each product.

*3 years for the control devices.

SUSTAINABILITY

By developing solutions to optimise management of natural light and heat, Nice is actively committed to sustainably improving people's quality of life.

The automation systems for blinds, shutters and sunscreens in general guarantee intelligent management of sunlight and temperature in a building, reducing the use of artificial light during the day, avoiding heat loss during the winter and protecting from direct sunlight in the summer.

Artificial light and central heating account for an average 35% of the annual energy consumption of a commercial building*.

Automating sunscreens and optimising management through climate sensors and the possibility of controlling the installation even from a distance means reducing the building's energy consumption and saving on costs.

*Source: Energy Information Administration, 2012 Commercial Buildings Energy Consumption Survey: Energy Usage Summary, publication March 2016.

NICE R&D CENTRE AND LABS: THE TECHNOLOGY CENTRE

Nice makes significant investments to guarantee even higher quality standards, which not only comply with directives and regulations, but also allow continuous product improvement, by exploiting high-tech procedures and experimentation and an innovative approach to open integration.

Through its advanced laboratories Nice carefully tests and controls its products every day in order to grant safety, quality, reliability and durability over time.

Nice has adopted a quality system that complies with standard **ISO 9001**, recognized worldwide for the quality management. The laboratory also meets the strict quality requirements of **EN 17025** standards.

Nice CE certified products comply with the European Directives and the leading internationally recognized standards.

Nice laboratories have been certified by outside certification bodies, attesting their technical expertise and conformity to carry out the tests that cover all the needs and the numerous products manufactured by the Nice group:

- LCIE (France)
- IMQ (Italy)
- CTC Advanced (Germany)
- Intertek (Sweden)
- UL (USA)

Semi-Anechoic Chamber

Evaluation of motors' electromagnetic compatibility and immunity to radio interference.

Acoustic Chamber

Noise and vibration tests on motors during functioning.

Climatic Chamber

Verification of a motor's ability to function correctly under conditions of high and low temperature and its ability to withstand rapid temperature changes.

Electrical safety tests to ensure that even extended periods of functioning will not cause the motor to overheat.

THE NICE GROUP IS THE IDEAL PARTNER FOR ANY PROJECT

Unique solutions, blending technology, innovation, quality and design.

Systems for the automation and control of gates, garage doors, road barriers, blinds, shutters, lighting and alarm systems are now integrated and can be managed by smart and intuitive interfaces: practical, functional and elegant solutions to help you enjoy your living spaces to the full.

Interior designers, architects and contractors can find in The Nice Group their privileged partner, which provides comprehensive support throughout the realisation of any project.

Nice means the simplest integration, the most elegant design and the most advanced electronics.

www.thenicegroup.com

A COMPLETE SYSTEM, FOR THE SIMPLEST INTEGRATION

Nice brings you the widest range of user-friendly control devices.

With Nice, you can operate and manage blinds, awnings and shutters automation, lighting and alarm systems, gates, garage doors and access barriers individually, in groups or even in scenarios.

> ERA P VIEW

TRANSMITTER FOR AUTOMATIONS ADVANCED MANAGEMENT

It can manage automations individually or in groups.
With intuitive graphic, clock and calendar to configure scheduled commands.
Standby function to reduce battery consumption, USB charging socket, and integrated sensors for automatic reactivation on each movement.
Advanced programming for professionals and flexible and simple management for all types of user.

> ERA P SERIES

PORTABLE TRANSMITTERS

This range of ergonomically designed, user-friendly transmitters is ideal for controlling blinds, shutters and other electrical loads.
With ON-OFF and dimmer function, plus slider for light control.

> ERA W SERIES

WALL-MOUNTED TRANSMITTERS

Available in 1 and 6 channel versions for controlling. Up to 6 automation systems can be controlled individually, in a group, or in multiple groups.

> AIR

THE WALL-MOUNTED TOUCHLESS TRANSMITTER

The ability to control one or more automation systems with a simple gesture. Just move your hand! No need to touch the device. Essential design, simple installation, battery power and high energy efficiency: the ideal solution wherever you need to wear gloves or your hands are not free.

> AGIO

THE ELEGANT AND SMART TRANSMITTER

4 channel radio transmitter to control lights, blinds, shutters and other electrical loads, with ON-OFF and dimmer function, plus slider for light control. Agio is available in three colours with glossy finish.

For night use, the keys of Agio light up when you place your hand near. Practical charger base with USB port. Built-in courtesy light.

> MYNICE WORLD APP

MANAGEMENT VIA SMARTPHONE AND TABLET

MyNice World lets you manage blinds, shutters, lighting, alarm systems and other Nice home automations, wherever you are.

MYNICE WORLD APP

With MyNice World app you can manage the automations for interior and exterior blinds, awnings and roller shutters, via smartphone and tablet both locally and remotely, by the DMBM connectivity module.

MyNice World will be compatible with MyNice alarm control units* and will allow to easily manage automations of your home: alarm system, gates, garage doors, lighting and electric loads.

*Coming Soon

SOME EXAMPLES OF POSSIBLE SCENARIOS

Good Morning

at a given time, disable the MyNice* alarm system and open blinds and roller shutters

Good Night

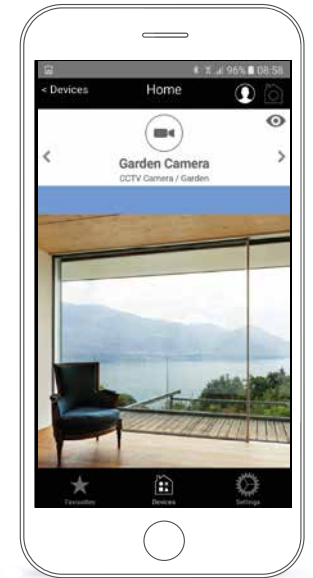

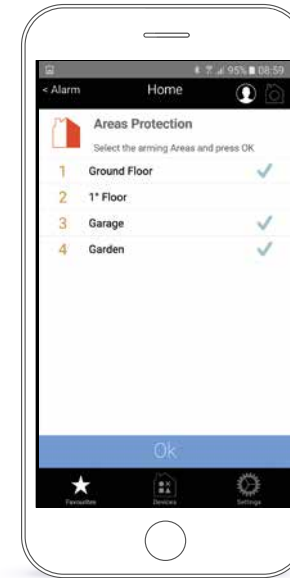

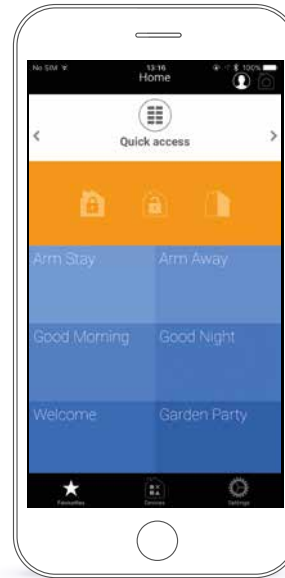

enable the MyNice* alarm system, lower the roller shutters and turn off the lights

Welcome

open the gate and garage door, disable the MyNice* alarm system and turn the lights on when you get home

USER-FRIENDLY GRAPHIC INTERFACE

to control all connected devices easily and comfortable, even at a distance.

SCENARIOS

Various scenarios can be created depending on your daily habits, customising the different days of the week (work days and weekends).

You can activate your chosen scenario at any time with a simple gesture.

EVERYTHING UNDER CONTROL

Manage the MyNice* alarm system at a distance, choosing with a simple click whether to activate the alarms in all, or just parts, of the building.

*Coming Soon

Vertical control panel with a yellow indicator light at the top, a red button, and several small circular indicators below.

Vertical control panel with a CE mark and a series of small circular indicators.

SYSTEM OF INTERFACES, CONNECTION AND POWER SUPPLY MODULES FOR THE BUILDINGS MANAGEMENT

A series of modules, each with a specific function, that combined and installed on a DIN rail permit to obtain a modular and extendible building management system.

The system can be upgraded with new modules at any time, guaranteeing optimal management of functions and space. Designed for the perfect mutual combination depending on the system that you want to implement, the modules guarantee an **easy integration with other technologies and with the most used protocols in the Building Automation industry as well.**

Communication between the modules is based on a system of connectors placed on the side of each module, without the need of additional wiring.

BETTER SERVICE, CLOSER TO YOU

Nice provides you, the professional, with a complete range of solutions designed to enhance your offer to the customer and to simplify installation and programming of all automation systems, from the simplest to the most sophisticated.

Technology, reliability and service.

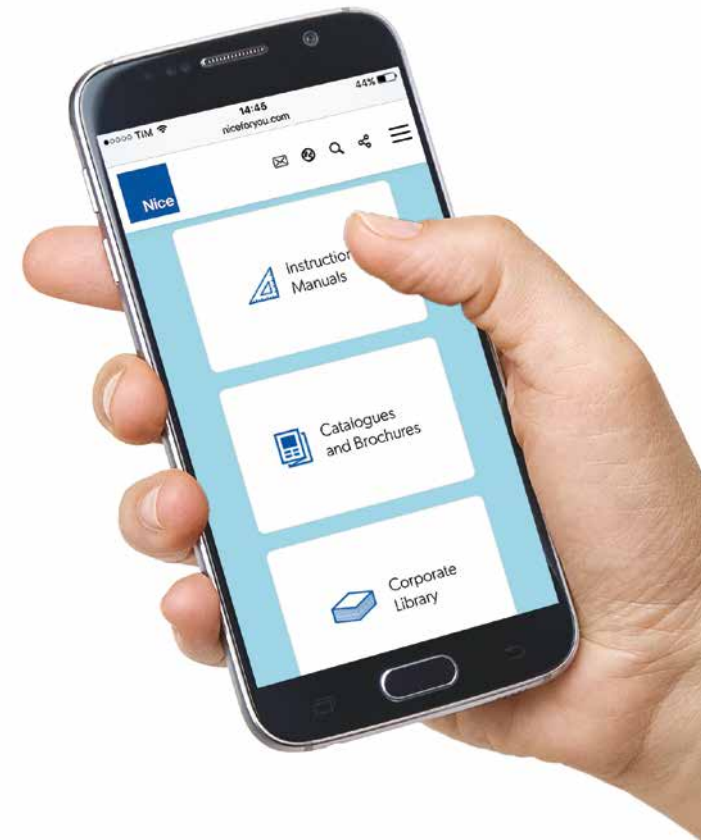

TRAINING

Nice offers a packed programme of training courses on products, sales techniques, installation and programming, to provide a complete professional training.

AFTER-SALES SERVICE

Nice guarantees **efficient and prompt service, even online**, on the www.niceforyou.com website, with contents dedicated both to the professional and to the end user.

- Section dedicated to **installation and programming tutorial videos**, with the **answers to the most frequently asked questions**.
- Section where you can download **instruction manuals, quick guides, catalogues and brochures**.
- Form you can use to ask for the **updated software or firmware** of any programmer or control unit.

PROGRAMMING DEVICES

TTPRO PALMTOP PROGRAMMER

For Nice tubular motors with dry contact or TTBUS technology.

Easy to use

- adjust limit switch positions and set the intermediate heights;
- set movement speed and duration;
- adjust the Soft Start, Soft Stop and obstacle detection functions;
- address of each motor;
- memorisation and cancellation of transmitters and climatic sensors.

Time saving

You can memorise the settings and copy them without repeating the procedure for each new automation.

NICE SCREEN CONFIGURATION TOOL

Advanced local or remote management of automation systems.

Intuitive, quick and precise

By connecting your PC or tablet to the DMBM module by LAN cable or Wi-Fi, the Nice Screen Configuration Tool allows you configure the entire automation system easily from your browser.

VIEW

all devices the automation system consists of: tubular motors, power supply, interface and connection modules, and control devices.

CONFIGURE

the automation parameters with maximum precision:

- adjust limit switch positions;
- set movement speed and duration (for Era Inn Smart motors);
- adjust the Soft Start, Soft Stop and obstacle detection functions;
- set the intermediate heights;
- memorise the transmitters.

CUSTOMISE

create groups, scenarios and programmed commands for a space to fit your lifestyle.

DIAGNOSTICS

you can view the number of movements of every Era Inn Smart motor, the temperature in real time, and the total operating time. For Era Inn Smart motors all events are recorded to simplify diagnostics, with the possibility of intervening later, either directly or remotely.

CUSTOMISED USE

You can create three different types of user.

Administrator: has access to all configurator functions and can manage all devices connected to the system.

Power User: has access to a limited number of functions authorised by the Administrator, to simplify and speed up maintenance and other operations, directly or remotely.

User: can quickly and easily activate the scenarios set previously, adapting the automation system to the user's specific habits and preferences.

HOW TO CHOOSE THE IDEAL MOTOR FOR YOUR INTERIOR BLIND

Nice has prepared this simple guide with some examples to help determine the ideal torque for automating roller blinds.

Before you start, you need the following information:

- the diameter of the winding roller (mm);
- the blind surface area (m²);
- the thickness of the fabric (mm);
- the specific weight of the fabric (g/m²);
- the weight of the terminal bar (kg);
- the desired motor operating speed (less than or equal to rated speed, or higher than rated speed).

To establish the most suitable motor torque for automating your application, identify the section in the table corresponding to the diameter of the roller used and cross-reference this against the dimensions of the fabric and the bar, with the required blind movement speed.

The number shown in the specific box identifies the version (3 Nm - 6 Nm - 10 Nm) of motor suitable for the application.

TUBULAR MOTORS Ø 35 mm and winding roller Ø 40 mm

Ø ROLLER (mm)	40																															
FABRIC THICKNESS (mm)	0.5																															
SPECIFIC WEIGHT OF FABRIC (g/m ²)	300																															
SPEED	≤ Rated															> Rated																
WEIGHT OF TERMINAL BAR (kg)	1					2					3					1					2					3						
WIDTH (m)	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5		
HEIGHT (m)	1	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	
	2	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	
	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	
	4	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	6	3	3	3	6	6
	5	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	3	6	3	3	3	6	6	3	3	6	6	6

The values highlighted in yellow indicate cases in which blind dimensions and weight are reduced: in these cases, correct obstacle detection operation when lowering needs to be verified.

The real motor torque value for automating your application depends on the specific installation. Every installation can limit the performance of the automation due to multiple factors (frictions, misalignments...).

Warning: if the set speed is higher than the rated speed, motor torque is automatically reduced by 50%.

For special applications consult the technical sales office.

Noise 35 dBA.

Comfort

Tubular motor rotation speed is constant in all load conditions, thus guaranteeing, for installations with multiple blinds, **perfect alignment between all blinds when opening and closing. Possibility to set the up and down movement times.**

Intelligent

Possibility to activate the **obstacle detection function** both while opening and closing.

Adjustable speed for opening and closing.

Compatibility with other systems

The practical dry contact input allows Era Inn Edge tubular motors to be connected to any system featuring dry contact technology available on the market.

Easy to install

Each motor can be programmed individually, without needing to power off the other motors in the same system.

- **Via a wireless connection**, using Nice transmitters.
- **Via a wired connection**, using the **TTPRO palmtop programmer.**

Increased acoustic and visual comfort

Soft Start and Soft Stop functions electronically controlled allow to set different levels of acceleration and deceleration in approach to the limit switches.

Precise and quick limit switch adjustment

using two pushbuttons located on the motor head.

Easy programming and diagnostic

thanks to the feedback of the two-colour LED.

Energy savings

Low power consumption both during operation and in stand-by.

Practical cable with connector

1.5 m long, which simplifies installation and maintenance operations.

Extended operation without the risk of overheating.

SUPPORTS - ERA INN S SERIES Ø 35 mm

SUPPORT KIT

523.40001

White support kit with flange, centre distance 40 mm, for Ø 35 mm motors and Ø 48 mm Acmeda roller.

525.40001

White support kit, centre distance 55 mm, for Ø 35 mm motors, max 3 Nm. Must be used together with cap kit 575.24801, 575.26000 or 575.25000.

SUPPORTS - ERA INN S SERIES Ø 35 mm

SUPPORT KIT

525.40003

White support kit, centre distance 55 mm, for Ø 35/45 mm motors, max 10 Nm.
Must be used together with cap kit 575.24801, 575.26000, 575.25000, 575.26300.

CAP KIT

575.24801

White cap kit for Ø 48 mm Acmeda roller, for Ø 35 mm motors.
Must be combined with the white support kit, centre distance 55 mm
for Ø 35 mm motors 525.40001 or 525.40003.

575.25000

White cap kit for 2" (50 mm) Rollease roller, for Ø 35 mm and Ø 45 mm
motors. Must be combined with the white support kit, centre distance 55
mm, for Ø 35/45 mm motors 525.40001 or 525.40003.

INTERMEDIATE SUPPORTS

523.40002

Intermediate white support, centre distance 40 mm, for $\varnothing 35$ mm motors. Must be used together with cap kit 575.24800.

525.40004

Intermediate white support, centre distance 55 mm, for $\varnothing 35/45$ mm motors. Must be combined with the intermediate cap kit 575.24800.

575.24800

Intermediate white cap kit for $\varnothing 48$ mm Acmeda roller, for $\varnothing 35$ mm motors. Must be combined with the intermediate supports 523.40002 or 525.40004.

OTHER SUPPORTS

525.10075

White support with 4 countersunk holes.

523.10015

Circular support with cross hole.

575.12040

Cap with pin for $\varnothing 40$ mm roller.

575.12050

Cap with pin for $\varnothing 50$ mm roller.

525.10070

Kit for vertical blinds, white (for use with 575.12040 or 575.12050).

523.00000

White head adapter compatible with star head universal motor supports (centre distance 29 mm).

COMPATIBLE ADAPTERS AND SUPPORTS - ERA INN S SERIES Ø 35 mm

ROUND 44 BENTHIN

NOTCH 52 BENTHIN

523.30002
White head adapter for Rollease Skyline series supports (centre distance 29 mm).

523.30001
White head adapter for Rollease R8 series supports (centre distance 29 mm).

523.30000
White universal adapter for Coulisse supports (centre distance 29 mm).

NB: Nice Era Inn size S Ø 35 mm and size M Ø 45 mm motors are compatible with the Acmeda/Rollease/Coulisse/Benthin supports adaptable to suit these sizes. For the technical specifications see the manufacturer's catalogue.

ERA INN ACTION M AC

100-240 Vac

Tubular motor with electronic limit switch.
M size Ø 45 mm.

Silent
Minimum vibrations and extremely high level of quietness during operation for the highest acoustic comfort.
Noise 33 dBA.

Comfort
 Tubular motor rotation speed is constant in all load conditions, thus guaranteeing, for installations with multiple blinds of the same size, **perfect alignment between all blinds when opening and closing.**

Intelligent
 Possibility to activate the **obstacle detection function** both while opening and closing.

Increased acoustic and visual comfort
 Soft Start and Soft Stop functions electronically controlled: pre-defined levels of acceleration and deceleration in the sections near the limit switch.

Precise and quick limit switch adjustment
 using two pushbuttons located on the motor head.

Easy programming and diagnostic
 thanks to the feedback of the two-colour LED.

Energy savings
 Low power consumption both during operation and in stand-by.

Practical cable with connector
 1.5 m long, which simplifies installation and maintenance operations.

Extended operation without the risk of overheating.

ERA INN EDGE M AC

RADIO 100-240 Vac

Tubular motor with electronic limit switch, practical dry contact input and built-in receiver.

M size Ø 45 mm.

Silent

Minimum vibrations and extremely high level of quietness during operation for the highest acoustic comfort.

Noise 33 dBA.

Comfort

Tubular motor rotation speed is constant in all load conditions, thus guaranteeing, for installations with multiple blinds, **perfect alignment between all blinds when opening and closing. Possibility to set the up and down movement times.**

Intelligent

Possibility to activate the **obstacle detection function** both while opening and closing.

Adjustable speed for opening and closing.

Compatibility with other systems

The practical dry contact input allows Era Inn Edge tubular motors to be connected to any system featuring dry contact technology available on the market.

Easy to install

Each motor can be programmed individually, without needing to power off the other motors in the same system.

- **Via a wireless connection**, using Nice transmitters.
- **Via a wired connection**, using the TTPRO palmtop programmer.

Increased acoustic and visual comfort

Soft Start and Soft Stop functions electronically controlled allow to set different levels of acceleration and deceleration in approach to the limit switches.

Precise and quick limit switch adjustment

using two pushbuttons located on the motor head.

Easy programming and diagnostic

thanks to the feedback of the two-colour LED.

Energy savings

SUPPORTS - ERA INN M SERIES Ø 45 mm

SUPPORT KIT

525.40002

White support kit, centre distance 55 mm. For Ø 45 mm motors, max 3 Nm.
Must be used together with cap kit 575.26000, 575.26300.

525.40003

White support kit, centre distance 55 mm, for Ø 35/45 mm motors, max 10 Nm.
Must be used together with cap kit 575.24801, 575.26000, 575.25000, 575.26300.

CAP KIT

575.26300

White cap kit for 2.5" Rollease roller, for \varnothing 35/45 mm motors.
Must be combined with the white support kit, centre distance 55 mm,
for \varnothing 35 mm and 45 mm motors, 525.40002 or 525.40003.

575.26000

White cap kit for \varnothing 60 mm Acmeda roller, for \varnothing 35/45 mm motors.
Must be combined with the white support kit, centre distance 55 mm,
for \varnothing 35 mm motors, 525.40002 or 525.40003.

INTERMEDIATE SUPPORTS

525.40004

Intermediate white support, centre distance 55 mm, for \varnothing 35/45 mm
motors.

OTHER SUPPORTS

575.12050

Cap with pin for \varnothing 50 mm roller.

575.12150

Cap without pin for \varnothing 50 mm roller.

575.12178

Cap without pin for \varnothing 78 mm roller.

525.10070

Kit for vertical blinds, white (Must be used together with 575.12040, 575.12050
or 575.12178).

525.20097

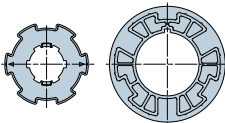

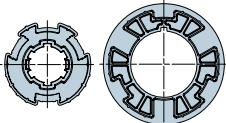

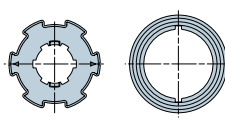

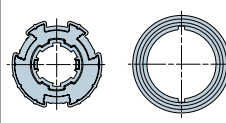

White support kit with flange.
For motors \varnothing 45 mm.

NB: Nice Era Inn size S Ø 35 mm and size M Ø 45 mm motors are compatible with the Acmeda/Rollease/Coulisse/Benthin supports adaptable to suit these sizes. For the technical specifications see the manufacturer's catalogue.

POWER SUPPLIES AND CABLES FOR THE ERA INN SYSTEM

MHPS, high-power power supplies for 24 Vdc tubular motors.

Greater safety

MHPS power supplies (Module High Power Supply) are fitted with a system to protect against short circuits, overload, voltage surge and overheating of the device: in these cases, the power supply shuts down temporarily, and resumes operation as soon as normal conditions are restored.

CODE	DESCRIPTION
MHPS24500	24 Vdc, 500 W POWER SUPPLY

DIN MODULES FOR THE BUILDINGS MANAGEMENT

DMLPS – DMBPD

Advanced customisable functions

The DMLPS and DMBPD modules can be installed on a DIN rail and combined with other modules in the Nice modular system to construct a control unit tailor-made for all requirements.

Both modules are required to construct the modular control unit.

Reliability and safety

Both modules are fitted with overload and polarity reversal protection and a 12V power indicator LED.

DMLPS (Din Module Low Power Supply) low voltage module to power all DIN modules in the Nice modular system.

DMBPD (Din Module Bus and Power Distribution) module to distribute the Bus signal and power all the motor interface and connectivity modules in the system.

INSTALLATION EXAMPLE

DMLPS and DMBPD modules are required to construct the Nice modular control unit. In the case of a system with a number of DIN rails, a DMBPD module is required for each rail.

DIMENSIONS

DMBPD

DMLPS2415

DMLPS2430

DMDCM

Motor interface DIN module with 4 inputs and 2 outputs dry contact programmable, to connect up to 2 groups of motors and operators to the modular system.

Each input can be either normally-open or normally-closed.

Each module **DMDCM (Din Module Dry Contact Motor)** has:

- 4 dry contact inputs for connecting a keypad, or other control systems;
- 2 outputs, for dry contact connection of up to 8 motors.

Performance

For the DMDCM to function correctly, it must be connected to both the DMLPS and DMBPD power modules.

Each Nice modular system can include up to 6 motor interface modules, unless a DMBM module is included.

If a DMBM module is present, up to 16 motor interface modules can be connected.

Programming

When installing a number of modules, rapid addressing of the outputs via jumper or the Nice Screen Configuration Tool included in the DMBM module.

Thanks to the Test mode, you can easily check which motors are connected to the module and verify the correctness of the electrical connections.

Each module is fitted with three diagnostic LEDs for easier programming.

DIMENSIONS

DMAM

Motor interface DIN module, with 4 dry contact programmable inputs and 2 high voltage outputs, to connect any commercially available AC tubular motor with three-wire connection cable to the Nice modular system.

Each input can be either normally-open or normally-closed.

Each module **DMAM (Din Module AC Motor)** has:

- 4 dry contact inputs for connecting a keypad, or other control systems;
- 2 outputs, each for connecting one AC tubular motor.

Performance

For the DMAM to function correctly, it must be connected to both the DMLPS and DMBPD power modules.

Each Nice modular system can include up to 6 motor interface modules, unless a DMBM module is included.

If a DMBM module is present, up to 16 motor interface modules can be connected.

Programming

When installing a number of modules, rapid addressing of the outputs via jumper or the Nice Screen Configuration Tool included in the DMBM module.

Thanks to the Test mode, you can easily check which motors are connected to the module and verify the correctness of the electrical connections.

Each module is fitted with three diagnostic LEDs for intuitive programming.

DIMENSIONS

DMBD

DIN radio connectivity modules.

Advanced management

The DMBD acts as an interface between the Nice modular system and the Nice radio transmitters and climate sensors. It can memorise up to 30 radio channels with a frequency of 433.92 MHz and can manage all the outputs in the control system.

Performance

For the DMBD module to function correctly, it must be connected to a modular system consisting of DMLPS and DMBPD power modules and at least one DMAM, DMDCM or DMBM module to transmit the commands received from the radio connectivity module by wire to each of the connected motors.

Practicality

Rapid coupling between the radio channels in the Nice modular system and the outputs of the motor interface DIN modules on the control unit, either manually or using the Nice Screen Configuration Tool.

Each module is fitted with three diagnostic LEDs for faster programming.

Connection to climate sensors

The module can also be connected via radio to Nice climate sensors. The tubular motors and lights will thus operate according to the weather and environmental conditions, optimising luminosity and energy management in the building.

Safety

The antenna cable improves the reception of DMBD module, avoiding shields and interference.

Protection class IP20.

DIMENSIONS

DMBM

DIN connectivity module with BusT4 output, LAN connection, RS232 terminal and 12 programmable dry contact inputs, for managing advanced systems.

Compatibility with other systems

The DMBM module makes Nice an open system, compatible with the protocols most widely used in the building automation sector.

Combining the DMBM module with the DMKNX module, the Nice system can be interfaced with a Konnex system.

The DMBM (Din Module Building Management Interface) module with 12 programmable

dry contact inputs can manage the entire automation system through a browser, from a PC or tablet connected to the module by LAN cable or Wi-Fi network, using the **Nice Screen Configuration Tool** or **MyNice World app**.

Advanced programming

Thanks to the BusT4 output, the module can be used to connect up to 50 motors in the Era Inn Smart series and configure parameters such as limit switches, speed, manoeuvre duration, acceleration, deceleration, intermediate positions, control logics via dry contacts and reactions to possible obstacles.

For the DMBM module to function correctly, it must be connected to both the DMBPD and DMLPS modules in the Nice modular system.

Advanced management

The Nice Screen Configuration Tool allows all the modules in the modular control system to be managed and programmed, configuring the outputs and automations in the system. Groups, scenarios and programmed commands can be created, thanks to the timer incorporated in the module, guaranteeing easy intuitive management. These operations can also be performed practically and rapidly from a distance.

- Maximum length of cable, from module to last motor: 600 m

DIMENSIONS

DMKNX

DIN connection module. It allows Nice automations to be interfaced with building management systems operating on a Konnex Bus.

Performance

For the DMKNX module to function correctly, it must be connected to a modular system consisting of DMLPS and DMBPD power modules and at least one DMAM, DMDCM or DMBM module to transmit the commands received from the building management system to the Nice automations.

AGIO

4 channel radio transmitter to control lights, blinds, shutters and other electrical loads, with on-off and dimmer functions.

Maximum integration with light

Agio can switch on and regulate light intensity of any lamp, control blinds, shutters and electrical loads, **guaranteeing the total management of any building's lighting sources, both artificial and natural.**

Elegant

ABS and polycarbonate body in 3 colours with a glossy finish: traffic white (RAL 9016), deep black (RAL 9005) and crimson red (RAL 3002).

Intelligent

For night use, the keys of Agio light up when you place your hand near, and with a rotation gesture the handy courtesy spot light concealed on the bottom lights up automatically.

Practical

The table-top or wall-mounted charger base works on induction: just rest the Agio on the base and it will always be charged for hours and hours of operation.

Thanks to the USB input, the charger base can be easily used for charging mobile devices such as smartphone and tablet as well.

AIR

Wall-mounted touchless radio transmitter for controlling one or a group of automation systems.

Versatile and elegant

The new Air wall-mounted transmitter, featuring an elegant and essential design, is the perfect solution in all contexts where one needs to wear gloves or cannot use hands, for example in medical or sterile environments, restaurant and hotel kitchens, or other commercial contexts.

Air is also the ideal solution for users wishing to add a touch of elegance and a contemporary feel to their home or office.

Advanced and exclusive

Air makes interaction with the automation system very simple: **to adjust the blinds, all it takes is a simple movement of the hand, without touching the device.** The transmitter confirms recognition of the hand movement via a flashing LED signal, transforming the command into movement.

Easy to install

Being a wireless, battery-powered device, **Air can be conveniently mounted anywhere on the wall, without requiring any building work. No wiring.**

Energy efficiency

Air is fitted with a sensor that detects when a hand is nearby: the LED only switches on when a person's presence is detected, thus reducing battery consumption.

Extended operating autonomy

Power supply by two AAAA 1.5 Vdc batteries, for an estimated life of around two years with average 10 transmissions per day.

CODE	DESCRIPTION	PCS./PACK
AIR 1RW	WALL-MOUNTED TOUCHLESS RADIO TRANSMITTER FOR CONTROLLING ONE AUTOMATION SYSTEM OR A GROUP OF AUTOMATION SYSTEMS	1

GESTURE CONTROL

HOMES AND OFFICES
Extremely simple automation control.

MEDICAL
The ideal solution for sterile environments.

INDUSTRIAL
Easy control even in the most critical situations.

FOOD
Practicality and convenience even in situations where the maximum levels of hygiene are required.

ERA P VIEW

Multifunction radio transmitter with intuitive graphic interface, LCD colour screen (2.2") navigation by 5-key joypad.

To manage up to 99 devices individually or in groups.
With clock and calendar to configure timed commands.

Advanced programming for professionals

The installer can access the programming directly from first start-up by inserting the batteries or subsequently using the keys on the back of the transmitter.

Easy to use for all requirements: can be used in either simple or advanced mode.

Advanced Users

Can modify the transmitter settings and the labels identifying the devices and create, time, modify and control zones, groups and scenarios. They can also limit access to the advanced menu by a numerical password.

Easy Users

Can simply and directly control a small number of devices pre-authorized by the advanced user. They can consult the dashboard and suspend timed events.

Practical and functional

If not used for a few seconds, Era P View switches to stand-by to reduce battery consumption. Thanks to the built-in sensors, the device comes on again automatically at any movement, or if any key is pressed.

USB socket: to recharge the batteries (if rechargeable).
With practical magnetic support for fixing to the wall.

ERA P SERIES

Portable radio transmitters to control lights and sunscreens with ON-OFF and dimmer function, plus slider for light control.

1 and 6 channel versions, to manage up to 6 groups in single, group or multigroup mode, **including with separate activation of climate sensors.**

433.92 MHz, rolling code with self-learning.

User friendly with ergonomic design.

Just a click for the right light at all times.

The **Sun for You** LED-displayed control keys enable and disable reception of the automatic commands transmitted by the climate sensors in the installation.

The Era P Vario version features a slider for analogic control of the dimmer function, adjusting brightness of the lights and Era Inn Edge motor speed.

Easy programming

The same transmitter can be programmed in a number of blinds or shutters to create groups.

The Memo Group function enables the last multigroup to be recalled. New transmitters can be **duplicated remotely and automatically** just by placing the new transmitter next to the one already programmed and pressing a key.

Extended autonomy (two AAA 1.5 V alkaline batteries).

Long range 200 m in open space, 35 m indoors.

P1 **P1S** **P6** **P6S** **P1V** **P6SV**

EASY AND AUTOMATIC DUPLICATION BY SIMPLY PLACING THE TWO TRANSMITTERS NEAR EACH OTHER.

INTUITIVE PROGRAMMING PROCEDURE USING THE KEYS ON THE BACK OF THE TRANSMITTER.

HANDY WALL SUPPORT AS STANDARD.

CODE	DESCRIPTION	PCS./PACK
P1	PORTABLE TRANSMITTER TO CONTROL 1 ELECTRICAL LOAD SYSTEM OR AUTOMATION GROUP	1
P1S	PORTABLE TRANSMITTER TO CONTROL 1 ELECTRICAL LOAD SYSTEM OR AUTOMATION GROUP, SUN ON/OFF KEYS	1
P6	PORTABLE TRANSMITTER TO CONTROL 6 ELECTRICAL LOAD SYSTEMS OR AUTOMATION GROUPS FOR ACTIVATION IN SINGLE OR MULTIGROUP MODE	1
P6S	PORTABLE TRANSMITTER TO CONTROL 6 ELECTRICAL LOAD SYSTEMS OR AUTOMATION GROUPS FOR ACTIVATION IN SINGLE OR MULTIGROUP MODE, SUN ON/OFF KEYS	1
P1V	PORTABLE TRANSMITTER TO CONTROL 1 ELECTRICAL LOAD SYSTEM WITH SLIDER DIMMER OR 1 AUTOMATION GROUP.	1
P6SV	PORTABLE TRANSMITTER TO CONTROL 6 ELECTRICAL LOAD SYSTEMS OR AUTOMATION GROUPS FOR ACTIVATION IN SINGLE OR MULTIGROUP MODE, WITH SLIDER DIMMER AND SUN ON/OFF KEYS	1

TECHNICAL SPECIFICATION

CODE	P1, P1S, P6, P6S, P1V, P6SV
POWER SUPPLY (Vdc)	ALKALINE BATTERIES - 2 AAA 1.5 V
BATTERY LIFETIME	ABOUT 2 YEARS WITH 10 TRANSMISSIONS PER DAY
FREQUENCY	433.92 MHz ± 100 KHz
PROTECTION CLASS (IP)	40 (USE IN THE HOME OR IN PROTECTED ENVIRONMENTS)
AVERAGE RANGE (m)	ESTIMATED AVERAGE RANGE 200 IN OPEN SPACE, 35 INDOORS
RADIO CODING	ROLLING CODE (0-CODE)
OPERATING TEMPERATURE (°C MIN/MAX)	-5 - +55
DIMENSIONS (mm)	49x150x14
WEIGHT (g)	85

ERA W SERIES

Wall-mounted radio transmitters to control sunscreens.

Available in 1 and 6 channel versions to control up to 6 automation groups in single, group, or multigroup mode, including with separate sun sensor activation. 433.92 MHz, rolling code with self-learning.

Simple management of groups

A single transmitter can be memorised in a number of blinds, vertical blinds or rolling shutters to create groups.

The MemoGroup function saves the last automation/group controlled. When a control key (up, stop, down) is selected, the group is recalled without having to select it again.

Easy to programme

For Nice tubular motors with built-in radio receiver, a simpler alternative programming procedure can be used, thanks to the 2 keys on the back of the transmitter, inside the battery compartment.

Rapid installation and maintenance

New transmitters can be duplicated remotely and automatically just by placing the new transmitter next to the one already programmed and pressing a key.

Convenience

Powered by 2 AAA 1.5 Vdc batteries commonly available on the market.

To manage the sun sensor in W1S and W6S versions, thanks to the "Sun for You" function, managed through the Sun On and Sun Off keys, communication with the sun sensors present in the installation (Nemo WSCT, Nemo SCT, Volo-S) can be turned on and off.

Thanks to the two LED indicators corresponding to the "Sun for You" keys, the status (on/off) of the sun sensors for the selected group/automation can be easily ascertained.

CODE	DESCRIPTION	PCS./PACK
W1	WALL-MOUNTED TRANSMITTER TO CONTROL 1 ELECTRICAL LOAD SYSTEM OR AUTOMATION GROUP	1
W1S	WALL-MOUNTED TRANSMITTER TO CONTROL 1 ELECTRICAL LOAD SYSTEM OR AUTOMATION GROUP, SUN ON/OFF KEYS	1
W6	WALL-MOUNTED TRANSMITTER TO CONTROL 6 ELECTRICAL LOAD SYSTEMS OR AUTOMATION GROUPS FOR ACTIVATION IN SINGLE OR MULTIGROUP MODE	1
W6S	WALL-MOUNTED TRANSMITTER TO CONTROL 6 ELECTRICAL LOAD SYSTEMS OR AUTOMATION GROUPS FOR ACTIVATION IN SINGLE OR MULTIGROUP MODE, SUN ON/OFF KEYS	1

TECHNICAL SPECIFICATION

POWER SUPPLY (Vdc)	2 AAA 1.5 Vdc ALKALINE BATTERIES
BATTERY LIFETIME	ESTIMATED 2 YEARS WITH 10 TRANSMISSIONS PER DAY
FREQUENCY	433.92 MHz (±100 kHz)
PROTECTION CLASS (IP)	40 (USE IN THE HOME OR IN PROTECTED ENVIRONMENTS)
AVERAGE RANGE	ESTIMATED 200 m IN OPEN SPACE, 35 m INDOORS
RADIO CODING	ROLLING CODE
OPERATING TEMP. (°C MIN/MAX)	-5°; +55°
DIMENSIONS (mm)	80x80x15
WEIGHT (g)	70

EASY DUPLICATION, JUST PLACE THE TWO TRANSMITTERS NEAR EACH OTHER AND PRESS A KEY.

INTUITIVE PROGRAMMING PROCEDURE USING THE KEYS ON THE BACK OF THE TRANSMITTER.

FULLY CONCEALED WALL SUPPORT INCLUDED IN PACK.

TTPRO

Palmtop programmer for Nice tubular motors with TTBUS technology or dry contact.

Time savings and incomparable precision

TTPRO simplifies management of rolling shutter and blind automation systems: programming is simple, by memorising the settings then copying them without repeating the sequence for each new automation.

Simple and immediate programming of

- the electronic limit switch;
- the intermediate heights;
- motor rotation speed;
- the duration of opening and closing movements;
- dry contact configuration;
- Soft Start and Soft Stop functions;
- obstacle detection function;
- the address of each motor;
- the climate sensors.

Simple management of transmitters

- immediate activation of a transmitter;
- cancellation of one or all transmitters;
- activation of climate sensors via radio.

Simple cancellation of the memory and resetting to default configurations.

"Macro" function to copy the settings to a number of motors.

Firmware update via PC and practical USB cable for recharging the TTPRO.

Radio test

Possibility to check for any radio interference nearby.

CODE	DESCRIPTION
TTPRO	PALMTOP PROGRAMMER FOR NICE TUBULAR MOTORS WITH TTBUS TECHNOLOGY OR DRY CONTACT
B1,2V2.4315	PAIR OF RECHARGEABLE BATTERIES FOR TTPRO

TECHNICAL SPECIFICATION

CODE	TTPRO
BATTERY POWER (Vdc)	2 AA BATTERIES
PC INTERFACE	USB
OPERATING TEMPERATURE (°C MIN/MAX)	-20 - +50
DIMENSIONS (mm)	155x95x29
WEIGHT (g)	200

OTHER PROGRAMMING UNITS

TTU

Programming unit for Era Inn Action motors (test cable).

CODE	PCS./PACK
TTU	PROGRAMMING UNIT (TEST CABLE) 1

NICE PEOPLE MAKE NICE THINGS

TheNicePlace

An area covering more than 3,000 sq.m adjacent to company headquarters, devoted to meetings and the exchange, sharing and generation of knowledge, is a “living” place, open to new experiences and initiatives that respond to the needs of a company that is continuing to grow, and reflect its international nature.

With this “social hub”, Nice aims to involve people and the community in an ongoing process, so as to stimulate the development of knowledge inside and outside of the company, individually and collectively, as well as to enhance the knowledge and skills of each individual.

www.thenicigroup.com

Nice Feel (for everyone everywhere liberty)

Through its “F.e.e.l.” project, Nice promotes a whole series of activities, initiatives and products that bring greater freedom of movement, autonomy and expression, including for people with special needs, such as the elderly and people with disabilities.

The Nice Place,
Oderzo, Treviso, Italy

Nice Experience
to discover, learn about and touch
Nice automation systems

GLOSSARY

MEMORY LOCKING

Memory locking lets you programme the transmitters safely, without the risk of accidental memorising. The function can be deactivated at any moment.

DRY CONTACT

Voltage-free contact.

ELECTRONIC LIMIT SWITCH

The electronic limit switch is the most advanced and reliable solution for managing the limit positions of a blind. The limit switch can in fact be easily adjusted using the TTU and TTPRO external programming units or the Nice Screen Configuration Tool.

The encoder technology in fact guarantees millimetric precision, maintenance of set values over time (including in high temperatures) and constant optimum force on the blind. A number of motors can be connected in parallel from a single control point without the need for additional control units.

DIAGNOSTICS LED

The LED on the Era Inn motor head simplifies installation by providing visual feedback through flashing green signals, and indicates alarms through flashing red signals. Should problems occur during installation, contact Nice technical service for prompt, specific support.

DECELERATION MODULATION

Function used to customise the roller acceleration and deceleration speeds during the soft start and soft stop phases.

MANUAL PROGRAMMING

Programming procedure for motors with electronic limit switch allowing the limit positions of the blind to be set precisely via a transmitter, wall-mounted control or programming device (TTU, TTPRO).

SEMI-AUTOMATIC PROGRAMMING

Programming procedure for motors with electronic limit switch, specifically for applications in which the blind physically strikes against the top of the structure. The top limit stop is programmed automatically with memorising of the position at which the blind strikes the structure. The bottom limit stop, on the other hand, is programmed using a manual procedure with visual confirmation.

INTERMEDIATE HEIGHT

Quickly and easily recalls your favourite position with a simple command. You can set numerous intermediate heights without the need for visual control of blind movement up to the required height.

BUILT-IN RADIO RECEIVER

The built-in radio receiver enables a command to be sent from a transmitter directly to the motor without having to use an external control unit with radio receiver which would otherwise have to be connected by wire.

The limit stops can thus be programmed conveniently by means of a transmitter and climate sensors can be connected easily by radio, thus simplifying the installation scheme.

OBSTACLE DETECTION

Safety system that detects the presence of an obstacle (object or person) when the blind is being raised or lowered: if an obstacle is detected, the motor immediately stops the current movement, and, if set, briefly reverses direction.

The function can be configured in various different ways:

- disabled;
- enabled only when raising;
- enabled when both raising and lowering.

The obstacle detection function reduces blind motor traction when reaching the top limit switch, if a blind box or other mechanical stop is present.

SOFT START

Acceleration in motor speed for a set number of turns when starting a movement, until reaching the set steady speed.

SOFT STOP

Deceleration in motor speed for a set number of turns when reaching a certain point in travel, until the end of the movement, corresponding to the limit switch.

LIMIT SWITCH ADJUSTMENT PUSHBUTTONS

Pushbuttons located on the Era Inn motor head that, once the limit switches have been programmed, can be used to fine-adjust the positions of the top and bottom limit switches.

When pressing the pushbutton, the motor operates briefly in order to rotate the roller by around 2°.

BUST4 TECHNOLOGY

Field bus for connecting Era Inn Smart motors to the DMBM module on the modular control unit.

As well as sending commands, the Nice Configuration Tool can be used for advanced motor parameter settings and acquire detailed feedback from the automation system.

TTBUS

Nice Ttbus technology is used to connect applications and accessories, and simplifies programming of the automation system.

It enables the installation scheme to be simplified by:

- controlling movement of the motor through a low voltage control
- connecting climate sensors by wire without the need for external control units
- a number of motors can be connected in parallel from a single control point without the need for additional control units.

As well as simplifying the installation scheme, this technology allows limit stops to be adjusted easily and quickly with the TTPRO external programming unit, even in installations with a large number of applications.

RATED SPEED

Motor speed set in the factory and expressed as rpm in the technical data in the catalogue.

ALPHABETICAL INDEX

CODE	PRODUCT CATEGORY	PAGE	CODE	PRODUCT CATEGORY	PAGE
AG4B	Portable transmitter to control blinds, shutters, lights and electrical loads, black (with charger base)	78	E EDGE SI 620 DC	Tubular motor with electronic limit switch, dry contact and built-in receiver. 24 VDC, 6 Nm, 20 rpm	34

557.00215	Power cable for Era Inn Edge DC and Era Inn Smart DC motors. Length 1.5 m	66	575.25000	White cap kit for 2" (50 mm) Rollease roller, for Ø 35/45 mm motors (must be combined with 525.40001 or 525.40003)	44
557.00230	Power cable for Era Inn Edge DC and Era Inn Smart DC motors. Length 3 m	66	575.26000	White cap kit for Ø 60 mm Acmeda roller, for Ø 35/45 mm motors (must be combined with 525.40002 or 525.40003)	63
557.00250	Power cable for Era Inn Edge DC and Era Inn Smart DC motors. Length 5 m	66	575.26300	White cap kit for 2.5" Rollease roller, for Ø 35/45 mm motors (must be combined with 525.40002 or 525.40003)	63
557.00315	Standard power cable for Era Inn Edge AC motors. Length 1.5 m	66			
557.00315/U	UL power cable for Era Inn Edge AC motors. Length 1.5 m	66			
557.00330	Standard power cable for Era Inn Edge AC motors. Length 3 m	66			
557.00330/U	UL power cable for Era Inn Edge AC motors. Length 3 m	66			
557.00350	Standard power cable for Era Inn Edge AC motors. Length 5 m	66			
557.00350/U	UL power cable for Era Inn Edge AC motors. Length 5 m	66			
557.00415	Standard power cable for Era Inn Action AC and Era Inn Smart AC motors. Length 1.5 m	66			
557.00415/U	UL power cable for Era Inn Action AC and Era Inn Smart AC motors. Length 1.5 m	66			
557.00430	Standard power cable for Era Inn Action AC and Era Inn Smart AC motors. Length 3 m	66			
557.00430/U	UL power cable for Era Inn Action AC and Era Inn Smart AC motors. Length 3 m	66			
557.00450	Standard power cable for Era Inn Action motors AC and Era Inn Smart AC. Length 5 m	66			
557.00450/U	UL power cable for Era Inn Action motors AC and Era Inn Smart AC. Length 5 m	66			
557.01315	Dry contact cable for Era Inn Edge and Era Inn Smart motors. Length 1.5 m	66			
557.02410	Bus T4 cable for Era Inn Smart motors. Length 1 m	66			
557.03102	Antenna cable for Era Inn Edge motors. Length 0.2 m	66			
557.23110	Antenna cable for DMBD radio module. Length 1 m	66			
575.12040	Cap with pin for Ø 40 mm roller	45
