

Nice

Get the most out of Yubii Home

The Nice **HubNetworklink** is a set of cable connectors for power and Internet (LAN) for **Yubii Home** and **Home Center 3 Lite**.

The product eases Yubii Home first time installation in all cases where Wi-Fi signal is weak or unavailable. It does not require any additional setup and guarantees stable connection to wired LAN network.

What if the Internet connection is unstable?

You can **install Yubii Home** by connecting the smart home hub with LAN cable

You can still **use the device** in a room where there is no Wi-Fi available, or where the signal is low or unstable

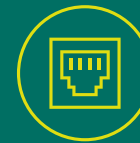

A single micro-usb plug that provides **power...**

...and **Internet connection**

Integrated LEDs that indicate the LAN connection status

Ethernet patchcord and all necessary cables are included

Nice

Why HubNetworklink?

During your first installation:

easy to setup accessory, will shorten the installation time. Internet is available right after having connected the device to the LAN and to YH or HC3L (no additional setup is needed).

When the Wi-Fi signal is weak or unavailable:

the device provides stable LAN connection to YH or HC3L (no additional internet connectivity is needed). The device can be used in all places where there is no Wi-Fi available, or where the signal is low or unstable.
