

Controlling Nice automations by smartphone

Guide to using
the Nice Wi-Fi interface
and choosing
the associated apps

Nice

Make the most of your offer with the Nice apps.

Controlling the movement and state of gate and garage door automations by smartphone, including remotely.

Geolocation

With the GPS on the smartphone activated, the gate or garage door opens or closes when the device is at the set distance.

Integration with the Apple HomeKit

Nice has Apple HomeKit certification with the IT4WIFI interface: manage Nice automations with Apple's Home app and create personalised scenes with the other HomeKit devices connected.

Voice commands

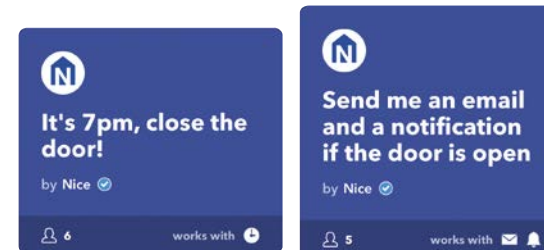

Open and close the garage door with Siri: the automation can be activated with just a voice command.

Compatibility with the IFTTT service

By using the free IFTTT (If This Then That) web platform, simple cause-effect rules can be created, associating the services provided by the various applications.

Programmed actions

Certain actions can be programmed to take place at set times and days. For example: "From Monday to Friday, open the gate and garage door at 7pm".
