Effective: June 27, 2019

We have prepared this Privacy Policy to explain how, why, and when we collect data from you to provide targeted advertising services for our clients. This privacy policy has been compiled to better serve those who are concerned with how their data is being used online. Please read our privacy policy carefully to get a clear understanding of how we collect, use, protect or otherwise handle data you provide us.

We will use the information that we collect about you in accordance with the EU General Data Protection Regulation (Regulation EU 2016/679), (further — “GDPR”) which becomes effective from 25 May 2018.

## 1. About Ubex AI services

Ubex AI («**Ubex**» or «**Platform**») is the platform that allows our Clients to buy or sell ad space on websites for online advertising. Our clients are businesses engaged in Internet advertising — advertisers, publishers, ad networks or ad agencies. Our clients buy and sell media by participating in online exchanges for ad space. Our technology powers this platform. When ad space on a website is bought or sold, usually to an advertiser, ad agency or ad network by a publisher, Ubex, as an agent for its clients, fulfills the transaction by delivering the ad to the Internet user who visits that site.

When you visit a website operated by an Advertiser or a third-party website where we could serve an ad to you, we may collect some or all of the Personal data described in the Ubex Privacy Notice. Our Platform uses that data as well as other data described below to help Advertisers provide ads to you that are more relevant to your preferences. For example, if you visit an Advertiser's website and shop for a mobile device, our Platform (or another platform we work with) may later serve you with targeted ads for the Advertiser's brand of gadget as you browse the internet or through other channels, such as mobile apps.

Ubex does not directly collect and store UDIDs or similar Mobile Device Identifier technologies.

- **Software Development Kits**

These are blocks of code or algorithm similar to Tags and Pixels that are embedded into a digital resource that allows us to track certain information related to the application use, gathered during the process of utilizing our technology
