Subject: National Tsunami Warning Center Routine Communications Tests for
the West Coast and Alaska Coast to Take Place on February 10, 2021

The NWS National Tsunami Warning Center (NTWC) and coastal NWS Weather
Forecast Offices (WFOs) will perform routine monthly tsunami communication
tests to ensure end-to-end readiness of NWS dissemination software and
hardware on Wednesday, February 10, 2021 for Alaska and West Coast states.

The intended recipients of these communication tests include designated
national focal points, state/territorial warning points, coastal WFOs,
U.S. Coast Guard and critical military dissemination points.

Each test message will be clearly identified as such, and will be
consistent with the product changes implemented by Service Change Notice
18-94: Changes to Valid Time Event Codes (VTEC) and Event Tracking Numbers
(ETNs) for Domestic Tsunami Test Products: Effective April 1, 2019:

https://www.weather.gov/media/notification/pdfs/scn18-94vtec_tsunami.pdf

VTEC codes for the test messages will start with the /T fixed identifier
(versus /O for operational messages). To provide additional assurance
that a test message is not inadvertently distributed as an actual
Warning/Advisory/Watch product, ETNs for the test messages will begin with
9 as the leading digit of the four character code.

The text products affected by routine monthly tsunami communication
testing are the national tsunami products issued under the following
Advanced Weather Interactive Processing System (AWIPS) Product Identifiers
(PILs) and World Meteorological Organization (WMO) Identifiers (IDs):

NTWC Product	AWIPS PIL	WMO ID
-----	-----	-----
Segmented Tsunami W/W/A for West Coast/BC/Alaska	TSUWCA	WEPA41
