Service Change Notice 24-34 Updated National Weather Service Headquarters Silver Spring MD 430 PM EDT Wed Apr 17 2024

- To: Subscribers: -NOAA Weather Wire Service -Emergency Managers Weather Information Network -NOAAPort Other NWS Partners, Users and Employees
- From: Ajay Mehta, Director NWS Office of Observations

Subject: Updated: NOAA-21 NUCAPS Soundings to be Added to the Satellite Broadcast Network (SBN) on or near May 9, 2024

Updated for implementation date moved from on or near April 29, 2024 to May 9, 2024.

On or near May 9, 2024, NOAA-Unique Combined Atmospheric Processing System (NUCAPS) soundings from the NOAA-21 polar-orbiting satellite will be added to the Satellite Broadcast Network (SBN).

NUCAPS estimates atmospheric temperature and moisture at 100 pressure levels between the earth's surface and the upper atmosphere, about an hour after local solar noon in each location. NOAA-21 NUCAPS soundings provide insight into the early-afternoon pre-convective environment, complementing the mid-morning soundings of the Metop-C satellite.

Each NOAA-21 NUCAPS file (granule) spans about 30 seconds of time (about 200 granules per orbit) and samples an area roughly 2100km by 200km with a grid of 30 x 4 = 120 atmospheric soundings. Each of these soundings estimates the following atmospheric parameters at 100 vertical levels:

Parameter	Units
Pressure	mb
Air temperature	K
Liquid water mixing ratio	g/g
Water vapor mixing ratio	g/g
Ozone mixing ratio	ppb
Sulfur dioxide mixing ratio	ppb

NOAA-21 NUCAPS soundings on SBN will amount to 1,800 files/day and 0.38 GB/day. They will be broadcast via the SBN NMC3 channel (Port 1205, PID 105) using the following World Meteorological Organization (WMO) header codes:

IUTN11	KNES	IUTN14	KNES	IUTN17	KNES
IUTN12	KNES	IUTN15	KNES	IUTN18	KNES
IUTN13	KNES	IUTN16	KNES	IUTN19	KNES

These codes are also used for NOAA-21 NUCAPS. They correspond to the geographic regions previously detailed in Service Change Notice (SCN) 19-59 (<u>https://www.weather.gov/media/notification/pdf2/scn19-</u>59nucaps soundings.pdf).

Additional details on NUCAPS soundings from NOAA-21 and other satellites are available on the NOAA Virtual Laborarory (VLab) at:

https://vlab.noaa.gov/web/towr-s/jpss-nucaps

Critical weather, enhanced caution, or other factors may affect the timing of this change.
