From:         Stephen W. Bieda III, Ph.D., Chief  
              Severe, Fire, Public, and Winter Weather Services Branch

Subject: Updated: Changes to Fire Weather Forecast Zones for WFO  
Pendleton, OR: Effective March 2025

Updated to announce the implementation date is changing from September  
2024 to March 2025

The NWS Weather Forecast Office (WFO) in Pendleton, OR (PDT) is planning  
to change Fire Weather Forecast Zones encompassing northeast Oregon in or  
around March 2025. The previous date of September 10, 2024 is no longer  
valid. When the exact date is known, NWS will issue an updated Service  
Change Notice (SCN). After this change, all forecasts and related  
products will use the new zone numbers and names shown below.

These changes are intended to provide more consistency across fire  
weather and fire danger rating areas to benefit the fire community and  
decision makers. Nested fire weather zones were developed within  
Northeast Oregon's fire danger rating areas. This will allow for  
increased flexibility and improved accuracy of forecast, fire weather  
watches and red flag warnings within the respective fire weather  
programs.

Four current zones will be realigned and converted into eight separate  
zones. These new zones are being divided to optimize issuance of hazard  
products for conditions that vary significantly across Northeast Oregon's  
geographic area.

The new zones are listed in Table 2.

Table 1. Universal Geographic Codes (UGC's): Current Fire Weather  
Forecast Zone Name

-----  
OR642: Southern Blue and Strawberry Mountains  
OR643: Northern Blue Mountains of Oregon  
OR644: Central Blue Mountains  
OR645: Wallowa District

Table 2. UGC: New Fire Weather Forecast Zone Name

```

-----
OR691: Western Forested Blue Mountains
OR692: Northern Blue Mountains of Oregon
OR693: Canyon Grasslands of Wallowa County
OR694: Grande Ronde Valley of Oregon
OR695: Eagle Cap Wilderness
OR696: John Day Valley
OR697: Central Blue Mountains
OR698: Southern Blue Mountains

```

Table 3. NWS Products Affected by the WFO Pendleton, OR Fire Weather Forecast Zone Changes

Product Name	WMO Heading	AWIPS ID
-----	-----	-----
Fire Weather Forecast	FNUS56 KPDT	FWFPDT
Fire Weather Message	WWUS86 KPDT	RFPDPDT

NWS partners and users will need to make necessary changes to their communications systems to accommodate these weather forecast zone changes.

Final versions of the shapefiles will be available in or around March 2025, with the exact date announced in December 2024.
