METİN ASLANTAŞ

Technology, Media & Telecommunications (TMT)
Industry Leader
Deloitte Turkey

In this keystone year, I am thrilled to present you the winners of the Fast 50 program in Turkey. As these results will be the final pre-pandemic results, we once again see an outstanding growth performance in the Turkish technology industry. 15 years ago, when Deloitte started this program in Turkey, we hoped to bring the Turkish technology entrepreneurs to the world stage. Over these years, we saw Turkish unicorns emerge from the early winners. We saw great diversity of the companies that make the list, and the genius people who are behind this success.

Witnessing the striking performance of both new and returning winners strengthens our belief that there will soon be technology firms among the globally renowned Turkish brands. We feel privileged for putting the spotlight on them. It is a great pleasure to see that each winner still achieves more than 100% growth.

This year we will be awarding for a second time, the Cross-Border and Women in Tech special awards. In addition, we added a “Runner Ups” list to recognize companies in their 3rd years, that are already promising great growths.

Fast 50 program is Deloitte’s commitment to a new generation of corporations that will shape the future of business. As such, we take great pride in identifying the fastest growing technology companies in Turkey whom we believe contribute greatly to the digital transformation of the Turkish industries. Our Technology Fast 50 program is a great means to do not only just that, but also celebrate the entire technology ecosystem for its productivity and creativity.

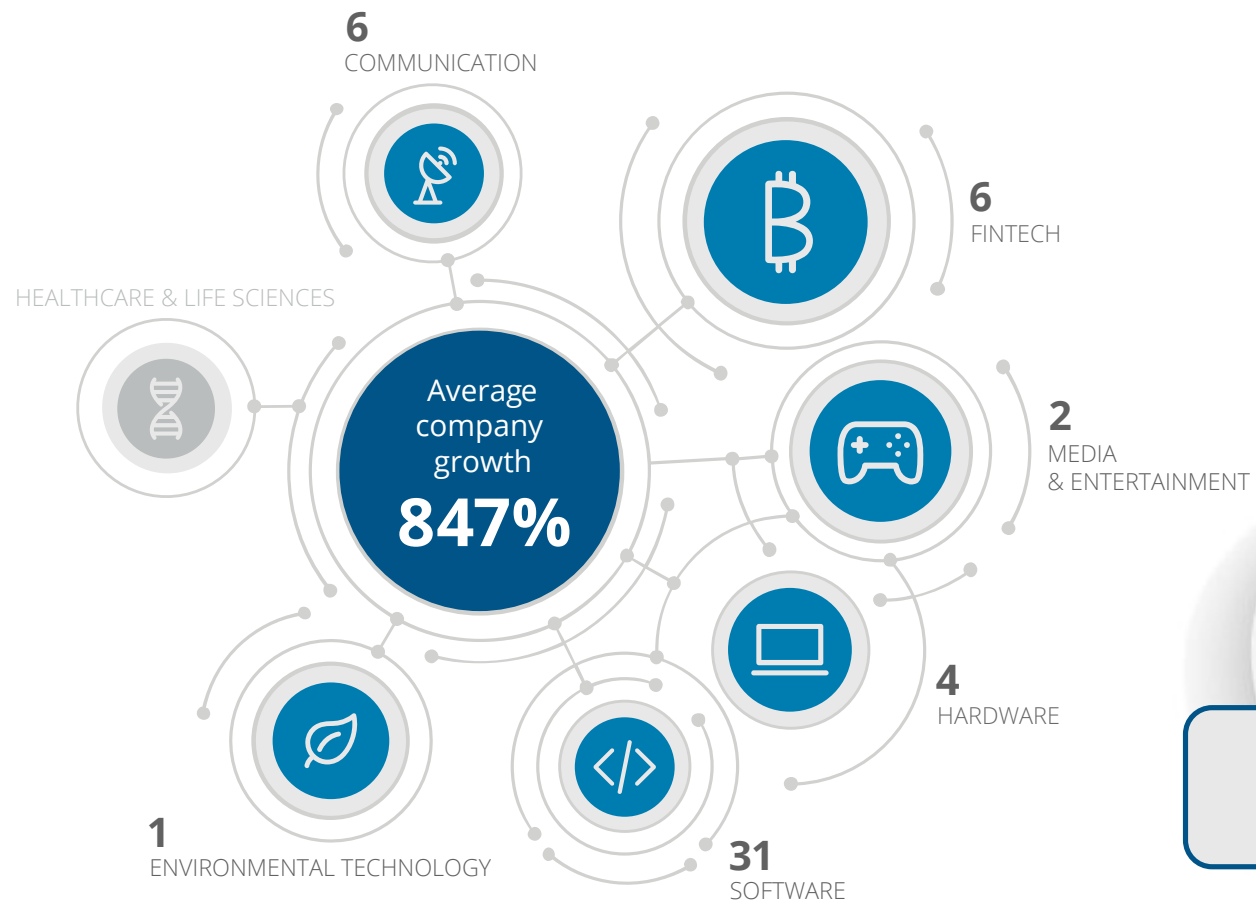

I want to extend my gratitude to Facebook for their continued cooperation and support in bringing Fast 50 2020 Turkey together.

I also would like to give thanks to our long-lasting NGO partners for their commitment to the Turkish technology ecosystem.

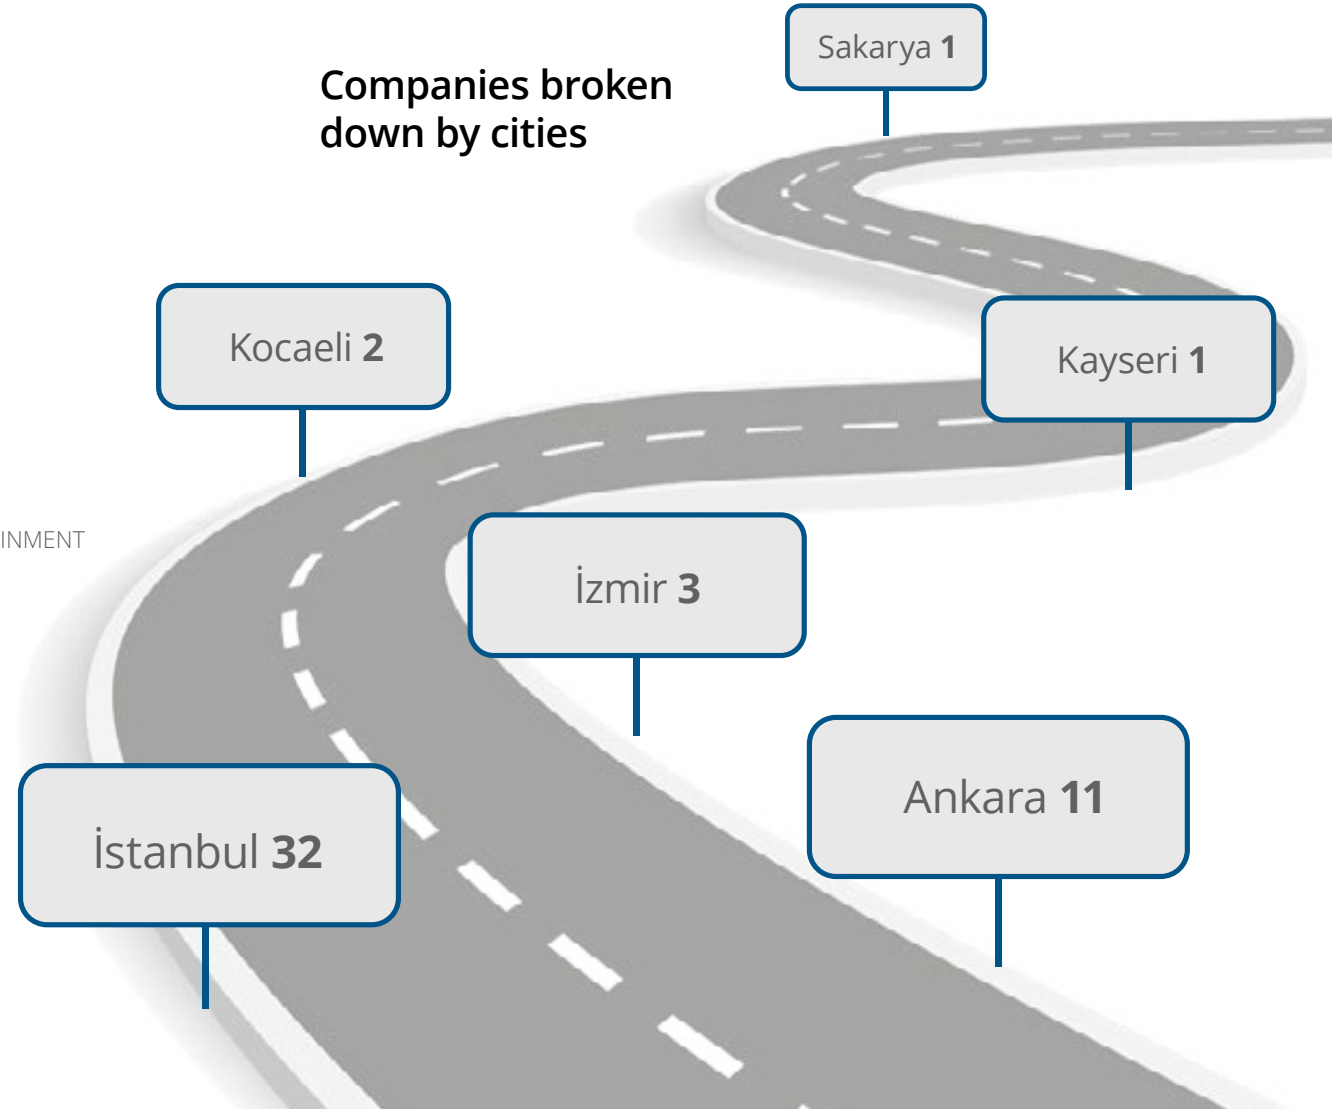

Once again with great pleasure, I present you the 50 fastest growing technology companies of Turkey.

Technology Fast 50 Turkey 2020 Big Star Award

Haluk Grgn
CEO, ASELSAN

+90 312 592 10 00

M. Akif Ersoy Mah. 296. Cad. No:16
Ankara

www.aselsan.com.tr

aselsan

ASELSAN, the leading defense company of Turkey, is a high technology, multi-product company that designs, develops and produces genuine products reflecting edge technologies to meet the requirements of Armed Forces and Public Security Entities.

ASELSAN provides its customers with high-tech system solutions for land, airborne, naval and aerospace applications in the fields of Modernization Solutions for All Platforms, Military Communications, Radar, Electronic Warfare, Electro-Optic, Navigation & Avionics, Weapon, C4ISR, Naval, Homeland Security and Traffic & Toll Collection Systems.

ASELSAN, with the firm belief that “a country’s technological wealth is composed of the various technologies in its possession”, allocates about 7% of its yearly turnover to R&D projects, which it finances through its own resources. For the last 13 years, ASELSAN sustained its position in the world as being in the list of top 100 defense companies.

Being the main solution provider for the Turkish Armed Forces, ASELSAN also sustains its competitiveness in the international arena, with its export to 63 countries and active participation in NATO and other international joint research/development and production programs. ASELSAN has become one of the significant members of global defense industry in terms of revenue and technological advancements.

Technology Fast 50 Turkey 2020 Big Star Award

İsmail Karahan
CEO, ASELSANNET

+90 312 295 46 24

Mustafa Kemal Mahallesi
2130. Sokak No:2 Çankaya/Ankara

www.aselsannet.com.tr

ASELSANNET is one of the biggest technology companies in Turkey, which was established in 2004 by ASELSAN. 100% of ASELSANNET 's capital belongs to ASELSAN, which is a foundation of the Turkish Armed Forces Foundation.

ASELSANNET has done many powerful projects since its establishment. Moreover, the firm decided not to chase technology, but shape technology. With this mentality, ASELSANNET started to provide its customers with high-tech system solutions in Wireless Communication Systems, Security Systems, IoT Systems, Geographic Information Systems and Information Technology Systems. In these sectors, the firm is giving services in Sales, Marketing & Marketing Development, Project Management, Dealer Channel Management,

Infrastructure & Construction Configuration, Maintenance, Repair, Installation, and Commissioning.

ASELSANNET, which serves with 34 dealers and authorized services throughout Turkey, carries out projects not only in the country but also in all around the World. With this perspective, ASELSANNET aims to offer new products and solutions to the market and to ensure customer satisfaction in international area.

One of the projects that Aselsannet has pioneered is the Electronic Concrete Monitoring System (ECMS) project. ECMS is the first monitoring system in construction area in all around the World.

Within the scope of the project, 100% domestic and nationally produced with Aselsannet in the knowledge of the Defense Industry Directorate; with features such as RFID Readers, IP Cameras, Mini PC, GSM Modem, Uninterrupted Power Supply and Smart Lock, the concrete crushing device is a first in Turkey. In addition, RFID tags were not produced in Turkey until now, was started after a 1-year R&D work, and this technology, which was used in many sectors, was localized and nationalized.

To conclude, Aselsannet made such an innovative system which is not only used in construction but also in many other sectors.

Initially founded as a research and development company, Zero Density aims to identify gaps in the industry and develop creative products to fill these gaps.

Zero Density adopts the mission of enabling the presentation of unique and immersive storytelling to the millions of viewers all around the world with its photo-realistic virtual solutions. Award-winning Reality Engine expands the limits of creativity while enabling the creation of rich content as well as better performance and highest-level visuals.

3

Media & Entertainment 

blutv

3,277% Growth rate

BluTV is the leading subscription video on demand (SVOD) entertainment platform first launched in Turkey in 2016 and then in MENA in 2018. BluTV is the first online video platform producing its own premium "Originals" in the EMEA region, which attracted millions of users to the service in Turkey. BluTV has produced more than 25 Originals since its launch in 2016. The service offers a wide range of award winning international and Turkish content in Turkey and the largest bouquet of Turkish Content under one roof globally. BluTV launched and reached more than 6 million users cumulatively in the last 4 years, thanks to its proprietary solutions on publishing, streaming, content delivery and subscription management developed in-house. BluTV also developed all client apps in-house and is now available on Web, IOS, Android and Smart TV. In this effort, BluTV kept investing in mastering the publishing, streaming and customer management solutions particularly, while outsourcing content delivery solutions later in the growth phase. BluTV's current Content Management System, Video Player and CRM (Subscription Management Platform) and payment gateway are the core of BluTV's services to end users. These solutions are used by leading media groups and service providers in Turkey as well. BluTV utilises the same core inhouse technologies to reach Arabic speaking audiences in MENA and all Turkish speaking audiences globally.

Fintech 
 FINARTZ

2,478% Growth rate

Founded in 2016 and headquartered in Yıldız Technical University Technopark. Finartz took its place among the world's leading companies with the global certificates it received. With its 3D Secure 2.0 software, it became one of 71 companies that received a certificate from EMVCo, the only authority in the world for the validity of secure payment transactions.

Positioning themselves as Fintech Studio, Finartz is the first Turkish company to receive a certificate, it became the second of 71 companies in the world with three of four different products. 3D Secure 2.0 is basically a fast and secure method of verifying the user during the payment process. Basically, there are fewer steps to be taken to complete the payment process and a less risky process in general.

At the same time, thanks to its smart verification method, 3D Secure 2.0, which controls transactions against buyer's purchasing behavior with artificial intelligence, becomes one of the strongest obstacles to identity theft. In this way, measures are taken against the security problem in internet shopping. Frictionless, fast and secured. Finartz keeps payment processes safe and smooth at all times, creating a reliable environment for consumers.

www.architech.com

Our story goes long way back but it is new as well. When we blended our years of finance and banking expertise with technology, something wonderful came out: Architech.

Architech, established in 2015 as a 100% subsidiary of Kuveyt Turk Participation Bank, revealed a brand new vision when it was understood how the main banking applications developed within the group companies to which it is associated turned into competitive advantage. Later, it was decided to spread this technology all over the world.

We aim to become a brand that develops competitive and effective products under market conditions by using innovative technologies about financial technologies and offers products / services at a global level to our customer portfolio which has been enriched by the global business volume in Europe, Asia and MENA region, especially Turkey. In line with this objective, as we serve all banks and technology companies of Kuwait Finance House Group, which is a leading global financial group, we incorporate the finance, technology and security knowledge experience of 60+ banks.

Software

**obilet.com****1,004%** Growth rate

obilet.com was founded by Ali Yılmaz and Yiğit Gürocak, two fresh graduates from Bilkent University, in 2012. Since then, obilet.com has recorded outstanding growth while becoming the #1 OTA in Turkey. As an end-to-end ticketing platform, listing hundreds of bus operators and airlines, obilet.com serves its users on a full-service model with direct booking and customer service. obilet.com also provides bus ticketing software as a B2B product.

obilet.com is the clear market leader in Turkey both in B2B and B2C segments, with ~200 bus firms using its SaaS, 15 million visitors/month and 5 million app downloads. According to SimilarWeb, obilet.com is among the top 20 most visited sites globally in Travel and Tourism category. The company is consistently being listed as one of the fastest-growing technology companies in EMEA by Deloitte.

With 200 million tickets sold annually, bus travel is the most preferred form of intercity travel in Turkey, making it the by-far-biggest intercity bus travel market in Europe. Despite being a traditionally offline-based market, the online rate in ticketing is consistently growing at a rapid rate. obilet.com is the leading contributor to this trend with 3-digit growth rates every year.

Akakçe is the leading comparison shopping platform in Turkey since its start in 2000. Akakçe aims to provide Turkish shoppers with state-of-the-art experience utilizing its proprietary technologies and continuous innovation.

Akakçe's web site and mobile applications support over 15 million shoppers every month. Shoppers can find detailed price, specification and location information for hundreds of thousands of products. To do this, Akakçe crawls over 600 online shops as well as thousands of marketplace sellers every few hours. For online merchants, Akakçe is one of the most important referral sources.

In 2013, Japan's Netprice group has made a strategic investment in the company. Akakçe is located in METU Technopark in Ankara and has an office in Istanbul.

Esentepe, Monumento Plaza,
Milangaz Cd. No:75/3, 34870
Kartal/Istanbul

www.enqura.com

The adventure, which began in 2014 with mobile and online banking and ATM solutions for banking, continues today with a team of 57 people, constantly with digital banking and insurance, mobile security & soft OTP, blockchain, business intelligence and artificial intelligence solutions, and closely following the technology. We currently offer products and services to more than 70 corporate customers in a variety of subjects.

Having a team which has an important expertise on data and investing R&D activities on the machine learning for the past 3 years makes it possible for us to provide many AI solutions. In parallel with recent developments on the banking side, we have developed a solution on ID verification. With the new law, banks will be able to process transactions with the customer remotely. In order to achieve this, we can offer a solution in which artificial intelligence is used (visual authentication and facial authentication) in the area of remote customer authentication.

By adding AI-based components to our omnichannel platform under our digital banking platform, we now have a platform that can analyze and recognize end users much better and offer them custom solutions. Finally, we provide products from our business partners in RPA and serve in a complementary way with our other solutions.

Tekrom Teknoloji A.S. was founded in 2003. We are young engineers who do not know boundaries. Our company has not been established by a capital group and has not received any investment so far. Our power comes from over 2,000 customers who believe in us. We are doing just one job for over 17 years and we give all our energy to our business. We are developing our technology with our gain. We are the leader in the Turkish e-commerce market and we provide software services to the best companies. We believe in the power of Anatolia. We opened up to Anatolia to discover our young people who produce value when given the opportunity. We do not expect global competitors to enter the Turkish market with the strength we have from these lands and we challenge the world by settingtling in Silicon Valley. We want to be a light for our young entrepreneurs who have dreams. As of 2020, we are employing over 194 payroll employees. We choose our colleagues from candidates who do not have the limits of their dreams. In our ecosystem, dozens of freelancers provide job opportunities and we are spreading e-exports for USD 500 billion export target in line with the targets of 2023.

Today's children will be the creators of the future, so we strongly believe we should support & empower them to help them solve real life problems. Twin does not only present the most advanced technology to the children but it also delivers kits to those in the most disadvantaged echelons of the society. We hope to Fill the knowledge gap in the society and provide equal opportunities of leisure and experience with science for kids such as our Accessible Twin Kits for visually impaired children. Twin provides 2 platforms: Science Kits and Digital Applications.

Science Kits: Informing and entertaining kits composed of do-it-yourself experiments designed exclusively for children to make them love science. It teaches the operating logic of technological devices using LEGO compatible electronic modules that can be connected easily with the help of magnets. Every kit has a set of readily available experiments to spark curiosity but the number of experiments is only limited by one's creativity.

Mobile Applications (Twiner & Twing): Twing consists of interdisciplinary courses that exposes kids to scientific concepts. It also provides a community, where children can do experiments, accept and create science challenges. They share and celebrate their projects while learning together. It gives better and high quality screen time while helping kids unlock their curiosity, accelerate learning with rich content.

Technology Fast 50 Turkey Program

The program celebrates Turkey's fastest-growing high-technology companies. The awards identify the trends that are shaping the technology, media and telecommunications sectors today. Based on revenue growth percentage over a four year period, the program includes companies from all related industry sub-sectors:

- Communications
- Environmental Technology
- Fintech
- Hardware
- Healthcare and Life sciences
- Media and Entertainment
- Software

To be eligible for Deloitte Technology Fast 50 Program, companies must meet the following criteria:

- to be a technology company which:
 - has its own proprietary technology that contributes to a significant portion of the company's operating revenues

- manufactures a technology-related product devotes a significant effort to research and development about technology
- be technology insentive, or use unique technology to solve problems
- to be in business for a minimum of four years
- whose parent company must be Turkish owned and headquartered in Turkey
- whose operating revenues must be at least €50,000 for 2016 and €1,000,000 in 2019.

Deloitte Technology Fast 50 Program is part of Deloitte's global Fast 500 program which runs simultaneously in countries such as USA, Canada, United Kingdom, France, Norway, Sweden, The Netherlands, Germany, Central Europe, Israel, South Africa, China, Australia, Hong Kong, India, Japan, Korea, Malaysia, New Zealand, Singapore, Taiwan, Thailand, South Korea and Finland.

Benefits of Participating at Technology Fast 50 Program: Technology Fast 50 winners receive exposure and recognition upon release of the rankings from both the media and business communities. The benefits are significant: Networking opportunity with other fast-growth Turkish technology companies and business organizations at our awards ceremony

- Networking opportunity with other fast-growth technology companies and business organizations from around the world through Deloitte Technology Fast 500 EMEA Program
- Access to leading edge industry research and commentary
- Recognition from the business and financial communities
- Benchmarking opportunity with similar companies
- Increased attention from the business and investment communities
- Media coverage
